Important information

Please read the Important information leaflet before you use your mobile phone.

Some of the services and features described in this User guide are not supported in all countries/regions or by all networks and/or service providers in all areas. Without limitation, this applies to the GSM International Emergency Number, 112. Please contact your network operator or service provider to determine availability of any specific service or feature and whether additional access or usage fees apply.

Use of certain features and applications described in this guide may require access to the Internet. You may incur data connection charges when you connect to the Internet from your phone. Contact your wireless service provider for more information.
Water resistance guide

In order for your Xperia™ active to be water resistant, the covers for the micro USB port and the headset connector must be firmly closed. Also, make sure that the back cover and the battery cover are attached correctly. The Startup guide provides instructions on how to correctly attach the battery cover and the back cover.

Avoid exposing your device to environments with excessive dust or moisture. Normal wear and tear along with damage to your device can reduce its ability to resist dust or moisture.

Ocean water  Swimming pool  Diving
Hot water  Sand/mud  Other liquid chemicals

Never submerge the mobile phone, the micro USB port or the headset connector in water, expose the mobile phone to any liquid chemicals, or expose your mobile phone to moist environments with extreme high or low temperatures. If water or liquid gets on the micro USB port and the headset connector, wipe it off with a dry cloth. The water resistance of the micro USB port and the headset connector are not guaranteed in all environments or conditions.

All compatible accessories including batteries, chargers, handsfree devices, micro USB cables, microSD™ cards, lanyards and so on are not dust and water resistant on their own.

Your warranty does not cover damage or defects caused by abuse or improper use of your device. If you have any further questions about the use of your products, get help from our Customer support service.
Android™ – what and why?

An Android™ phone can perform many of the same functions as a computer. But you can also adjust it to better suit your needs, to receive the information you want, and have fun at the same time. You can add and delete applications, or enhance them to improve functionality. At Android Market™ you can download a range of applications and games from a constantly growing collection. You can also integrate applications on your Android™ phone with your personal data and online accounts. For example, you can back up your phone contacts, access your different email accounts and calendars from one place, keep track of your appointments, and engage in as much social networking as you like.

Android™ phones are constantly evolving. When a new software version is available and your phone supports this new software, you can update your phone to get new features and the latest improvements.

💡 Your Android™ phone is pre-loaded with Google™ services. To get the most out of the provided Google™ services, you should have a Google™ account and sign in to it when you first start your phone. You also need to have Internet access to use many of the features in Android™.

Applications

An application is a phone program that helps you perform a task. For example, there are applications to make calls, take photos and download more applications.
Getting started

Assembly

To remove the back cover and the battery cover

1. Insert a thumb nail into the gap under the headset connector cover and the micro USB port cover, then lift up the two covers.
2. Insert a thumb nail into the gap (as shown in step 2 of the illustration above), then lift up the back cover slowly but firmly.
3. Place a thumb nail under the lip (indicated by the arrow on the battery cover), then lift up and remove the battery cover.

! Do not use sharp objects that may damage parts of the phone.

To insert the SIM card and the memory card

- Remove the back cover and the battery cover, then insert the SIM card and the memory card into the relevant slots.

! Memory card may not be included with purchase in all markets.
To remove the battery

1. Remove the back cover and the battery cover.
2. Place the tip of your finger into the opening on the bottom side of the battery and lift up the battery.

To remove the memory card

! You must unmount your memory card or turn off your phone before you can safely remove the memory card. For more information, see Safely removing the memory card on page 32.

* Remove the back cover and the battery cover, then draw the memory card outwards to remove it.

To remove the SIM card

1. Remove the back cover, the battery cover and the battery.
2. Place the tip of your finger on the SIM card and slide it out of its slot.
To attach the battery cover and the back cover

1. Place the battery cover over the back of the phone so that the camera lens hole in the cover fits over the camera lens.
2. Press down gently on all edges of the battery cover to attach it securely.
3. Place the back cover over the back of the phone so that the camera lens hole in the cover fits over the camera lens. Then press down firmly on all edges of the back cover to attach it tightly.
4. Press down the micro USB port cover and the headset connector cover to make sure they are fully latched.

! Correctly attaching the back cover and the battery cover can keep your phone resistant to water. The phone is not resistant to water when the micro USB port cover or the headset connector cover is open, for example, when the phone is charging or when it’s connected to a wired headset.
Turning the phone on and off

To turn on the phone

1. Press and hold down the power key on the left side of the phone until the phone vibrates.
2. If your screen goes dark, briefly press the power key to activate the screen.
3. To unlock the screen, drag to the right across the screen.
4. Enter your SIM card PIN when requested, and select OK.

- Your SIM card PIN is initially supplied by your network operator, but you can change it later from the Settings menu. To correct a mistake made while entering your SIM card PIN, tap .

! It may take a while for the phone to start up.

To turn off the phone

1. Press and hold down the power key until the options menu opens.
2. In the options menu, tap Power off.
3. Tap OK.

! It may take a while for the phone to shut down.

Screen lock

When your phone is on and left idle for a set period of time, the screen darkens to save battery power, and locks automatically. This lock prevents unwanted actions on the touchscreen when you are not using it. When music is playing, you can also control the playback of audio tracks without unlocking the screen.

To activate the screen

• Briefly press the power key .

To pause an audio track from the lockscreen

1. To activate the screen, briefly press the power key .
2. When the music player controls appear, tap .

To change the currently playing audio track from the lockscreen

1. To activate the screen, briefly press the power key .
2. When the music player controls appear, tap or .

To unlock the screen

• Drag to the right across the screen.

To lock the screen manually

• When the screen is active, briefly press the power key .
Setup guide
The first time you start your phone, a setup guide opens to explain basic phone functions and help you enter essential settings. This is a good time to configure the phone to your specific needs. You can also skip some steps and access the setup guide manually at a later stage.

To access the setup guide manually
1. From the Home screen, tap 
2. Find and tap Setup guide.

Accounts and services
Sign in to your online service accounts from your phone and benefit from a range of services. Combine services and get even more out of them. For example, collect contacts from your Google™ and Facebook™ accounts and integrate them into your phonebook, so you have everything in one place.

You can sign up to online services from your phone as well as from a computer. When you sign up for the first time, an account is created with your user name, password, settings and personal information. The next time you sign in, you get a personalised view.

Google™ account
Having a Google account is key to using a range of applications and services with your Android phone. You need a Google™ account, for example, to use the Gmail™ application in your phone, to chat to friends using Google Talk™, to synchronise your phone calendar with your Google Calendar™, and to download applications and games from Android Market™.

Microsoft® Exchange ActiveSync® account
Synchronise your phone with your corporate Microsoft® Exchange ActiveSync® account. This way, you keep your work email, contacts and calendar events with you at all times.

Facebook™ account
Facebook™ is a social networking service that connects you with friends, family and colleagues around the world. Set up Facebook to work on your phone so that you can stay in touch from anywhere.

SyncML™ account
Synchronise your phone with an Internet server using SyncML™. View and manage contacts, calendar events and bookmarks from your phone just as easily as you would from a computer.

Using the keys

- **Back**
  - Go back to the previous screen
  - Close the on-screen keypad, a dialog box, an options menu, or the Notification panel

- **Home**
  - Go to the Home screen
  - Press and hold to open a window showing your most recently used applications

- **Menu**
  - Open a list of options available in the current screen or application

Battery

Charging the battery

Your phone battery is partly charged when you buy the phone. It may take a few minutes before the battery icon appears on the screen when you connect the phone charger cable to a power source, such as a USB port or a phone charger. You can still use your phone while it is charging. Charging the phone over a long period of time, for example, overnight, does not damage the battery or the phone.

The battery will start to discharge a little after it is fully charged and then charges again after a certain time when the phone charger is connected. This is to extend battery life and may result in the charge status showing a level below 100 percent.
To charge the phone

1. Plug the phone charger into a power outlet.
2. Plug one end of the USB cable into the charger (or into the USB port of a computer).
3. Plug the other end of the cable into the micro USB port on your phone, with the USB symbol facing up. The battery status LED lights up when charging starts.

4. When the battery status LED is green, the phone is fully charged. Disconnect the USB cable from your phone by pulling it straight outwards.

![Battery LED status](image)

**Battery LED status**

<table>
<thead>
<tr>
<th>Status</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Green</td>
<td>The battery is fully charged</td>
</tr>
<tr>
<td>Flashing red</td>
<td>The battery level is low</td>
</tr>
<tr>
<td>Orange</td>
<td>The battery is charging. The battery level is between low and full</td>
</tr>
</tbody>
</table>

Make sure not to bend the connector when removing the cable from the phone.

To check the battery level

1. From your Home screen, tap 📲.
2. Find and tap **Settings > About phone > Status > Battery level**.

**Improving battery performance**

The following tips can help you improve battery performance:

- Charge your phone often. This will not affect the lifetime of the battery.
- Downloading data from the Internet is power consuming. When you’re not using the Internet, you can save power by disabling all data connections over mobile networks. You can do this from **Settings > More… > Mobile networks > Data enabled**.
setting does not prevent your phone from transmitting data over other wireless networks.

- Turn off GPS, Bluetooth™ and Wi-Fi® when you don’t need these features. You can turn them on and off more easily by adding the Status switch widget to your Home screen. You do not need to turn off 3G.
- Set your synchronisation applications (used to synchronise your email, calendar and contacts) to synchronise manually. You can also synchronise automatically, but increase the synchronisation intervals.
- Check the battery usage menu in the phone to see which applications use the most power. Your battery consumes more power when you use video and music streaming applications, such as YouTube™. Some Android Market™ applications also consume more power.
- Close and exit applications that you are not using.
- Lower the screen display brightness level.
- Turn off your phone or use Flight mode if you are in an area with no network coverage. Otherwise, your phone repeatedly scans for available networks, and this consumes power.
- Use a Sony Ericsson original handsfree device to listen to music. Handsfree devices demand less battery power than the phone’s loudspeakers.
- Keep your phone in standby whenever possible. Standby time refers to the time during which the phone is connected to the network and is not being used.
- Go to www.sonymobile.com to get the latest battery performance tips for your phone model.

To access the battery usage menu

1. From your Home screen, tap ☰.
2. Find and tap Settings > Battery to see which installed applications consume the most battery power.

To add the Data traffic widget to your Home screen

1. From your Home screen, press ☰.
2. Tap Add > Widgets.
3. Select the Data traffic widget. You can now turn on and off your data connection more easily.

Using the touchscreen

A protective plastic sheet is attached to the screen of your phone when you buy it. You should peel off this sheet before using the touchscreen. Otherwise, the touchscreen might not function properly.

When your phone is on and left idle for a set period of time, the screen darkens to save battery power, and locks automatically. This lock prevents unwanted actions on the touchscreen when you are not using it. You can also set personal locks to protect your subscription and make sure only you can access your phone content.

⚠️ Your phone screen is made from glass. Do not touch the screen if the glass is cracked or shattered. Avoid trying to repair a damaged screen yourself. Glass screens are sensitive to drops and mechanical shocks. Cases of negligent care are not covered by the Sony Ericsson warranty service.

To open or highlight an item

- Tap the item.

To mark or unmark options

- Tap the relevant checkbox or list option.
Unmarked list option

**Zooming**
The zoom options available depend on the application you are using.

**To zoom**
- When available, tap or to zoom in or out.
- You may have to drag the screen (in any direction) to make the zoom icons appear.

**To zoom with two fingers**
- Place two fingers on the screen at once and pinch them together (to zoom out) or spread them apart (to zoom in).
- Use the zoom function when viewing photos and maps, or when browsing the web.

**Scrolling**
Scroll by moving your finger up or down on the screen. On some web pages you can also scroll to the sides.

- Dragging or flicking will not activate anything on the screen.
To scroll

• Drag or flick your finger in the direction you want to scroll on the screen.

💡 To scroll more quickly, flick your finger in the direction you want to go on the screen.

To flick

• To scroll more quickly, flick your finger in the direction you want to go on the screen. You can wait for the scrolling movement to stop by itself, or you can stop it immediately by tapping the screen.

Sensors

Your phone includes a light sensor and a proximity sensor. The light sensor detects the ambient light level and adjusts the brightness of the screen accordingly. The proximity sensor turns the touch screen off when your face touches the screen. This prevents you from unintentionally activating phone functions when you are engaged in a call.
Home screen

Your phone Home screen is the equivalent of the desktop on a computer. It’s your gateway to the main features in your phone. You can customise your Home screen with widgets, shortcuts, folders, themes, wallpaper and other items.

The four corners on the Home screen help you access applications or web page shortcuts quickly.

The Home screen extends beyond the regular screen display width, so you need to flick left or right to view content in one of the screen’s four extensions. shows which part of the Home screen you are in.

To go to the Home screen
- Press .

To browse the Home screen
- Flick right or left.

To share an item from your Home screen
1 Press to open your Home screen.
2 Touch and hold an item until it magnifies and the phone vibrates, then drag the item to .
3 Select an option and confirm, if necessary. You can now share the applications and widgets you like with your friends so they can download and use them.

Widgets
Widgets are small applications that you can use directly on your Home screen. For example, the Music player widget allows you to start playing music directly, and the Timescape™ widget displays incoming messages.

Some widgets are resizable, so you can expand them to view more content or shrink them to save space on your Home screen.

To add a widget to the Home screen
1 From your Home screen, press .
2 Tap Add > Widgets.
3 Tap a widget.

To resize a widget
1 Touch and hold a widget until it magnifies and the phone vibrates, then release the widget. If the widget can be resized, a highlighted frame and resizing dots appear.
2 Drag the dots inward or outward to shrink or expand the widget.
3 To confirm the new size of the widget, tap anywhere on the Home screen.
To get an overview of all widgets on your Home screen

• Pinch on any area of your Home screen. All widgets from different parts of your Home screen are now displayed in one view.

💡 When all Home screen widgets are combined in one view, tap on any widget to go to the part of the Home screen containing that widget.

Rearranging your Home screen

Customise the appearance of your Home screen and change the features that you can access from it. Change the screen background, move items around, create folders, and add shortcuts to contacts.

To open the options menu of your Home screen

You can open the Home screen options menu in two ways:

• From your Home screen, press 📞.
• Touch and hold on any part of your Home screen.

Rearranging your Home screen corners

Rearrange the items in your Home screen corners with the applications or web page shortcuts (bookmarks) you access most frequently. You can add a maximum of four shortcuts to each of the corners.

To add an application to a corner

1. From your Home screen, tap 📚.
2. Touch and hold an application until the Home screen appears and the phone vibrates, then drag the application to one of the corners.

To add a web page shortcut to a corner

1. From your Home screen, press 📞.
2. Tap Add > Shortcuts > Bookmark.
3. Select a bookmark that you want to add to your Home screen.
4. Drag the bookmark to one of the corners.

💡 See To add a bookmarked web page to your Home screen on page 81.

To delete an item from a corner

1. From your Home screen, tap one of the corners to magnify the corner.
2. Touch and hold an item in the corner until the phone vibrates, then drag the item to 📞.

To move an item away from a corner

1. From your Home screen, tap one of the corners to magnify the corner.
2. Touch and hold an item in the corner until the phone vibrates, then drag the item away from the corner and drop the item on an area of your Home screen.

To add a shortcut to the Home screen

1. From your Home screen, press 📞.
2. Tap Add > Shortcuts.
3. Find and select a shortcut.

💡 Add an application shortcut directly from the Application screen by touching and holding the application.
To add a folder to the Home screen
1. From your Home screen, press 📚.
2. Tap Add > Folder.
3. Enter a name for the folder and tap Done.

- Drag and drop an item on top of another item on your Home screen to create a folder automatically.

To add items to a folder
• Touch and hold an item until it magnifies and the phone vibrates, then drag the item to the folder.

To rename a folder
1. Tap the folder to open it.
2. Touch the folder's title bar to show the Folder name field.
3. Enter the new folder name and tap Done.

To move an item on the Home screen
1. Press 🏡 to open your Home screen.
2. Touch and hold an item until it magnifies and the phone vibrates, then drag the item to the new location.

To delete an item from the Home screen
• Touch and hold an item until it magnifies and the phone vibrates, then drag the item to 🚫.

Changing the background of your Home screen
Adapt the Home screen to your own style using wallpapers and different themes.

To change your Home screen wallpaper
1. From your Home screen, press 📚.
2. Tap Wallpaper, then select a wallpaper.

- You can use a photo you have taken, or an animation. Go to Android Market™ and other sources to download, for example, live wallpapers that change with the changing hours of the day.

To set a theme
1. From your Home screen, press 📚.
2. Tap Theme, then select a theme.

! When you change a theme, the background also changes in some applications.

Accessing and using applications
Open applications from shortcuts on your Home screen or from the Application screen.

Application screen
The Application screen, which you open from your Home screen, contains the applications that come installed with your phone as well as the applications you download.
The Application screen extends beyond the regular screen width, so you need to flick left and right to view all content.
To open the Application screen

- From your Home screen, tap 📱.

To browse the Application screen
- Open the Application screen, then flick right or left.

To create a shortcut to an application on the Home screen
1. From your Home screen, tap 📱.
2. Touch and hold an application until it appears on your Home screen, then drag it to the desired location.

To share an application from your Application screen
1. From your Home screen, tap 📱.
2. Touch and hold an application until it appears on your Home screen, then drag the item to 📱.
3. Select an option and confirm, if necessary. You can now share the applications you like with your friends so they can download and use them.

Opening and closing applications

To open an application
- From your Home screen or the Application screen, tap the application.

To close an application
- Press 🔄.

⚠️ Some applications are paused when you press 🔄 to exit, while other applications may continue to run in the background. In the first case, the next time you open the application, you can continue where you left off. Remember that some applications may cause data connection charges when they are running in the background, for example, social networking services.

Recently used applications window
You can view and access recently used applications from this window.

To open the recently used applications window
- Press and hold down 📱.

Application menu
You can open a menu at any time when you are using an application by pressing the 📱 key on your phone. The menu will look different depending on which application you are using.
To open a menu in an application
• While using the application, press ➞.
  ! A menu is not available in all applications.

Rearranging your Application screen
Move the applications around on the Application screen according to your preferences.

To arrange applications on the Application screen
1 From your Home screen, tap ▪ to go to the Application screen.
2 Tap ➢ and select an option.

To move an application on the Application screen
1 Open the Application screen, then tap ➢.
2 Touch and hold an item until it magnifies and the phone vibrates, then drag the item to the new location.
3 Tap ➢ to exit edit mode.
  ! You can only move your applications when ➢ is selected.

To uninstall an application from the Application screen
1 From your Home screen, tap ▪.
2 Tap 🚸. All uninstallable applications are marked with a 🚸 icon.
3 Tap the application you want to uninstall, then tap OK.

Status and notifications
The status bar at the top of your screen shows what’s going on in your phone. To the left you get notifications when there is something new or ongoing. For example, new message and calendar notifications appear here. The right side shows the signal strength, battery status, and other information.

Checking notifications and ongoing activities
You can drag down the status bar to open the Notification panel and get more information. For example, open a new message or view a calendar event from the Notification panel. You can also open running applications, such as the music player.
To open the Notification panel

• Drag the status bar downwards.

To close the Notification panel

• Drag the tab at the bottom of the Notification panel upwards.

To open a running application from the Notification panel

• Tap the icon for the running application to open it.

To open the phone settings menu from the Notification panel

• Tap ☑.

To dismiss a notification from the Notification panel

• Place your finger on a notification and flick left or right.

To clear all notifications from the Notification panel

• Tap ☑.
Phone settings menu

View and change your phone settings from the Settings menu.

To access the phone settings
1. From the Home screen, tap \[\text{ ]}.  
2. Tap Settings.

Typing text

Use either the Phonepad or the on-screen keyboard to enter letters, numbers and other characters. The Phonepad is similar to a standard 12-key telephone keypad while the on-screen keyboard has a QWERTY layout.

Phonepad

The Phonepad is similar to a standard 12-key telephone keypad. It gives you predictive text and multi-tap input options. You can activate the Phonepad text input method via the keyboard settings. The Phonepad is only available in portrait orientation.

Using the Phonepad

1. Choose a text input option
2. Change the character case and turn on the caps lock
3. Display numbers
4. Display symbols and smileys
5. Enter a space
6. Open the input settings menu to change, for example, the Writing languages. This key also changes the writing language when more than one input language is selected.
7. Enter a carriage return or confirm text input
8. Delete a character before the cursor

! All illustrations are for illustration purposes only and may not accurately depict the actual phone.

To display the Phonepad to enter text
• While holding the phone in portrait orientation, tap a text entry field.

To enter text using the Phonepad

When using the Phonepad, you can choose from two input options:
• When \([\text{ }^\text{ }\text{ }\text{ }\text{ }\text{ }\text{ }\text{ ]}\) appears in the Phonepad, tap each character key only once, even if the letter you want is not the first letter on the key. Tap the word that appears or tap \([\text{ }^\text{ }\text{ }\text{ }\text{ }\text{ }\text{ }\text{ }\text{ }\text{ ]}\) to view more word suggestions and select a word from the list.
• When \( \text{YOU} \) appears in the Phonepad, tap the on-screen key for the character you want to enter. Keep pressing this key until the desired character is selected. Then do the same for the next character you want to enter, and so on.

**To hide the Phonepad**
• When the Phonepad is open, press \( \text{Hide} \).

**To shift between upper-case and lower-case letters**
• Before you enter a letter, tap \( \text{Shift} \) to switch to upper-case \( \text{Shift}^{\uparrow} \), or vice versa.

**To turn on the caps lock**
• Before you type a word, tap \( \text{Caps} \) or \( \text{Caps}^{\downarrow} \) until \( \text{Caps} \) appears.

**To enter numbers using the Phonepad**
• When the Phonepad is open, tap \( \text{123} \). A Phonepad with numbers appears.

**To insert symbols and smileys using the Phonepad**
1 When the Phonepad is open, tap \( \text{Symbols} \). A grid with symbols and smileys appears.
2 Scroll up or down to view more options. Tap a symbol or smiley to select it.

**To delete characters**
• Tap to place the cursor after the character you want to delete, then tap \( \text{Delete} \).

**To enter a carriage return**
• When you enter text, tap \( \text{Enter} \) to enter a carriage return.

**To select text**
1 When you enter text, touch and hold the text field or double-tap within the text field.
2 The word you touch gets highlighted by tabs on both sides. Drag the tabs left or right to select more text.

**To edit text in portrait orientation**
1 When you enter text, touch and hold the text field until an application bar appears.
2 Select the text you want to edit, and then use the application bar to make your desired changes.

To paste text from the clipboard, you can also hold the text field until Paste appears, then tap Paste.

**Application bar**

<table>
<thead>
<tr>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
</tr>
</thead>
<tbody>
<tr>
<td>Close the application bar</td>
<td>Select all text</td>
<td>Cut text</td>
<td>Copy text</td>
<td>Paste text</td>
</tr>
</tbody>
</table>

\( \text{Cut} \) only appears when you have text stored on the clipboard.
To edit text in landscape orientation

1 When you enter text, touch and hold the text field until Edit... appears.
2 Select the text you want to work with, then tap Edit... and select an option.

! To paste text from the clipboard, you can also hold the text field until Paste appears, then tap Paste.

On-screen keyboard
Tap the keys of the on-screen QWERTY keyboard to enter text conveniently. Some applications open the on-screen keyboard automatically. You can also open this keyboard by touching a text field.

Using the on-screen keyboard

1 Change the character case and turn on the caps lock. For some languages, this key is used to access extra characters in the language.
2 Close the on-screen keyboard view
3 Display numbers and symbols. Touch and hold to display smileys.
4 Enter a space
5 Open the input settings menu to change, for example, the Writing languages. This key also changes the writing language when more than one input language is selected.
6 Enter a carriage return or confirm text input
7 Delete a character before the cursor

! All illustrations are for illustration purposes only and may not accurately depict the actual phone.

To open the on-screen keyboard for the first time
• Hold your phone horizontally and tap a text entry field.
• To use the on-screen keyboard in portrait orientation, tap a text entry field, then tap or touch and hold if you have already selected more than one input language. Tap Portrait keyboard and select an option.

* Once you’ve made the setting, you can simply activate the on-screen keyboard by tapping a text entry field.

To switch between the on-screen keyboard and the Phonepad

1 When you enter text, tap , or touch and hold if you have already selected more than one input language.
2 Tap Portrait keyboard and select an option.

! Remember the Phonepad is only available in portrait orientation.
To enter text using the on-screen keyboard
1 To enter a character visible on the keyboard, tap the character.
2 To enter a character variant, touch and hold a regular keyboard character to
get a list of available options, then select from the list. For example, to enter
"é", touch and hold "e" until other options appear, then, while keeping your
finger pressed on the keyboard, drag to and select "é".

To enter numbers or symbols
- When you enter text, tap 
  A keyboard with numbers and symbols appears.
  Tap  to view more options.

To insert a smiley
1 When you enter text, touch and hold 
2 Select a smiley.

Keyboard and Phonepad settings
You can select settings for the on-screen keyboard and the Phonepad, such as
writing language and automatic correction.

To access the on-screen keyboard and the Phonepad settings
• When you enter text using the on-screen keyboard or Phonepad, tap 
  If you
  have selected more than one writing language, touch and hold  instead.

To change writing language using the on-screen keyboard or the Phonepad
1 When you enter text, tap  or touch and hold  if you have already selected
  more than one input language.
2 Tap Writing languages and select the languages you want to use for writing.
3 If you have selected more than one input language, tap  to switch between
  the selected writing languages.

To switch keyboards
1 When you enter text, drag the status bar downwards to open the Notification
  panel.
2 Tap Select input method, and select an option.

Text input settings
When entering text, you can access a text input settings menu that helps you set
options for text prediction. For example, you can decide how you want the phone to
present word alternatives and correct words as you type, or enable the text input
application to remember new words you write.

To change the text input settings
1 When you enter text using the on-screen keyboard or the Phonepad, tap 
  or
  touch and hold  .
2 Tap Text input settings.
3 Select the desired settings.

Customising your phone
Adapt the phone to your needs by adjusting, for example, your personal ringtone,
phone language and your Privacy settings.

Adjusting the volume
You can adjust the ringtone volume for phone calls and notifications as well as for
music and video playback.
To adjust the ring volume with the volume key
• Press the volume key up or down.

To adjust the media playing volume with the volume key
• When playing music or watching video, press the volume key up or down.

To set the phone to silent mode
1 From your Home screen, tap 📱.
2 Find and tap Settings > Sound.
3 Select Silent mode, then select Mute.

To set the phone to vibrate mode
1 From your Home screen, tap 📱.
2 Find and tap Settings > Sound.
3 Select Silent mode, then select Vibrate.

To set the phone to vibrate and ring mode
1 From your Home screen, tap 📱.
2 Find and tap Settings > Sound.
3 Select Silent mode, then select Off.
4 Mark the Vibrate on ring checkbox.

To enhance the speaker loudness
1 From your Home screen, tap 📱.
2 Find and tap Settings > Sound.
3 Mark the xLOUD™ checkbox.

Time and date
You can change the time and date in your phone.

To set the date manually
1 From your Home screen, tap 📱.
2 Find and tap Settings > Date & time.
3 Unmark the Automatic date & time checkbox, if it is marked.
4 Tap Set date.
5 Adjust the date by scrolling up and down.
6 Tap Set.

To set the time manually
1 From your Home screen, tap 📱.
2 Find and tap Settings > Date & time.
3 Unmark the Automatic date & time checkbox, if it is marked.
4 Unmark the Use 24-hour format checkbox, if it is marked.
5 Tap Set time.
6 Scroll up or down to adjust the hour and minute.
7 Scroll up or down to adjust between am and pm.
8 Tap Set.

To set the time zone
1 From your Home screen, tap 📱.
2 Find and tap Settings > Date & time.
3 Unmark the Automatic time zone checkbox, if it is marked.
4 Tap Select time zone.
5 Select an option.

To set the date format
1 From your Home screen, tap 📱.
2 Find and tap Settings > Date & time > Select date format.
3 Select an option.
Ringtone settings

To set a phone ringtone
1. From your Home screen, tap ☰.
2. Find and tap Settings > Sound > Phone ringtone.
3. Select a ringtone.
4. Tap Done.

To enable touch tones
1. From your Home screen, tap ☰.
2. Find and tap Settings > Sound.
3. Mark the Dial pad touch tones and Touch sounds checkboxes.

To select a notification ringtone
1. From your Home screen, tap ☰.
2. Find and tap Settings > Sound > Default notification.
3. Select a ringtone.
4. Tap Done.

Screen settings

To adjust the screen brightness
1. From your Home screen, tap ☰.
2. Find and tap Settings > Display > Brightness.
3. To decrease the screen brightness, drag the slider to the left. To increase it, drag the slider to the right.
4. Tap OK.

💡 The brightness level affects your battery performance. For tips on how to improve battery performance, see Improving battery performance on page 16.

To set the screen to vibrate
1. From your Home screen, tap ☰.
2. Find and tap Settings > Sound.
3. Mark the Vibrate on touch checkbox. The screen now vibrates when you tap soft keys and certain applications.

To adjust the idle time before the screen turns off
1. From your Home screen, tap ☰.
2. Find and tap Settings > Display > Sleep.
3. Select an option.

💡 To turn off the screen quickly, briefly press the power key 🌈.

To keep the screen active while the phone is charging
1. From the Home screen, tap ☰.
2. Find and tap Settings > Developer options.
3. Mark the Stay awake checkbox.

Phone language
You can select a language to use in your phone.
To change the phone language

1. From your Home screen, tap 📲.
2. Find and tap Settings > Language & input > Language.
3. Select an option.

⚠️ If you select the wrong language and cannot read the menu texts, find and tap the Settings icon 📘. Then select the entry beside 📘, and select the first entry in the following menu. You can then select the language you want.

Airplane mode

In Airplane mode, your phone’s network and radio transceivers are turned off to prevent disturbance to sensitive equipment. However, you can still play games, listen to music, watch videos and other content, as long as all this content is saved on your memory card or internal storage. You can also be notified by alarms, if alarms are activated.

💡 Turning on Airplane mode reduces battery consumption.

To turn on Airplane mode

1. From your Home screen, tap 📲.
2. Find and tap Settings > More….
3. Mark the Flight mode checkbox.

⚠️ You can also select Flight mode from the Phone options menu. To access the Phone options menu, press and hold down the power key 🆚.

Memory

You can save content on a memory card and in the phone memory. Music, video clips and photos are saved on the memory card while applications, contacts and messages are saved in the phone memory.

⚠️ You can move some applications from the phone memory to the memory card.

To move an application to the memory card

1. From your Home screen, tap 📲.
2. Find and tap Settings > Apps.
3. Tap the desired application.
4. Tap Move to SD card.

⚠️ It is not possible to move some applications from the phone memory to the memory card.

Memory card

⚠️ You may have to purchase a memory card separately.

Your phone supports a microSD™ memory card, which is used for media content. This type of card can also be used as a portable memory card with other compatible devices.

⚠️ Without a memory card you cannot use the camera, nor can you play or download music files and video clips.

Safely removing the memory card

You can safely remove the memory card from your phone any time when the phone is turned off. If you want to remove the memory card when your phone is on, you must first unmount the memory card before you physically remove it from the phone. This can prevent damaging the memory card or losing data stored on the memory card.
To unmount the memory card
1. From your Home screen, tap 📱 ．
2. Find and tap Settings > Storage > Unmount SD card.

Formatting the memory card
You can format the memory card in your phone, for example, to free up memory. This means that you erase all data on the card.

⚠️ All content on the memory card gets erased when you format it. Make sure you make backups of everything you want to save before formatting the memory card. To back up your content, you can copy it to your computer. For more information, refer to the chapter Connecting your phone to a computer on page 116.

To format the memory card
1. From your Home screen, tap 📱 ．
2. Find and tap Settings > Storage > Unmount SD card.
3. After you have unmounted the memory card, tap Erase SD card.

Stereo portable handsfree

To use a handsfree
1. Connect a portable handsfree.
2. To answer a call, press the call handling key. If you listen to music, it stops when you receive a call and resumes when the call has ended.
3. To end a call, press the call handling key.

⚠️ If a portable handsfree is not included with the phone, you may purchase it separately.

Internet and messaging settings
To send text and multimedia messages and to access the Internet, you must have a 2G/3G mobile data connection and the correct settings. There are different ways to get these settings:

- For most mobile phone networks and operators, Internet and messaging settings come preinstalled on your phone. You can then start using the Internet and send messages right away.
- In some cases you will get the option to download Internet and messaging settings the first time you turn on your phone. It is also possible to download these settings later from the Settings menu.
- You can manually add and change Internet and network settings in your phone at any time. Contact your network operator for detailed information on your Internet and messaging settings.
To download Internet and messaging settings
1 From your Home screen, tap ☟.
2 Find and tap Settings > Xperia™ > Internet settings.

To view the current Access Point Name (APN)
1 From the Home screen, tap ☟.
2 Find and tap Settings > More... > Mobile networks.
3 Tap Access Point Names.

If you have several available connections, the active network connection will be indicated by a marked button to the right.

To configure APN settings manually
1 From the Home screen, tap ☟.
2 Find and tap Settings > More... > Mobile networks > Access Point Names.
3 Press ☟.
4 Tap New APN.
5 Tap Name and enter the name of the network profile you want to create.
6 Tap APN and enter the access point name.
7 Enter all other information required by your network operator.
8 Press ☟ and tap Save ☟.

Contact your network operator for detailed information about your network settings.

To reset the default Internet settings
1 From the Home screen, tap ☟.
2 Tap Settings > More... > Mobile networks > Access Point Names.
3 Press ☟.
4 Tap Reset to default.

Usage info
For quality purposes, Sony Ericsson collects anonymous bug reports and statistics regarding your phone usage. None of the information gathered includes personal data. By default, the usage info sending option is not activated. But you can choose to activate it if you like.

To send usage info
1 From your Home screen, tap ☟.
2 Find and tap Settings > Xperia™ > Usage info settings.
3 Mark the Send usage info checkbox.

Turning off data traffic
You can disable all data connections over 2G/3G networks with your phone to avoid any unwanted data downloads and synchronisations. Contact your network operator if you need detailed information about your subscription plan and data traffic costs.

💡 When data traffic is turned off, you can still use Wi-Fi® and Bluetooth™ connections. You can also send and receive multimedia messages.

To turn off all data traffic
1 From your Home screen, tap ☟.
2 Find and tap Settings > More... > Mobile networks.
3 Unmark the Data enabled checkbox.

Data roaming
Depending on your network operator, it might be possible to allow mobile data connections via 2G/3G outside of your home network (roaming). Please note that
data transmission charges may apply. Contact your network operator for more information.

! Applications may sometimes use the Internet connection in your home network without any notification, for example, when sending search and synchronisation requests. Additional charges may apply for data roaming. Consult your service provider.

To activate data roaming
1 From the Home screen, tap ☰.
2 Find and tap Settings > More… > Mobile networks.
3 Mark the Data roaming checkbox.

! You can’t activate data roaming when data connections have been deactivated

Network settings
Your phone automatically switches between networks depending on available networks over different locations. Initially, your phone is configured to use the fastest mobile network mode available for data. But you can configure your phone manually to use only a slower 2G network mode for data, to extend the life of your battery between charges. You can also configure your phone to access a different set of network modes entirely, or to behave in special ways when roaming.

To select a network mode
1 From your Home screen, tap ☰.
2 Find and tap Settings > More… > Mobile networks.
3 Tap Network Mode.
4 Select a network mode.

To select another network manually
1 From the Home screen, tap ☰.
2 Find and tap Settings > More… > Mobile networks > Network operators.
3 Tap Search mode.
4 When a popup window appears, tap Manual.
5 Select a network.

! If you select a network manually, your phone will not search for other networks, even if you move out of range of the manually selected network.

To activate automatic network selection
1 From the Home screen, tap ☰.
2 Find and tap Settings > More… > Mobile networks > Network operators.
3 Tap Search mode.
4 Tap Automatic.
Calling

Emergency calls
Your phone supports international emergency numbers, for example, 112 or 911. You can normally use these numbers to make emergency calls in any country, with or without the SIM card inserted, if you are within range of a network.

To make an emergency call
1. From your Home screen, tap 📞.
2. Find and Tap Phone.
3. Enter the emergency number and tap Call. To delete a number, tap 📞.

💡 You can make emergency calls when no SIM card is inserted or when outgoing calls are barred.

To make an emergency call while the SIM card is locked
1. Tap Emergency call.
2. Enter the emergency number and tap Call. To delete a number, tap 📞.

Call handling
You can make a call by manually dialling a phone number, by tapping a number saved in your phone's contact list, or by tapping the phone number in your call log view.

When you make a call, your phone's main microphone works together with the second microphone to suppress noise and background sound.

⚠️ Do not cover the second microphone while you make a call.

To make a call by dialling
1. From your Home screen, tap 📞.
2. Find and tap Phone.
3. Enter the number of the recipient and tap Call. To delete a number, tap 📞.

To end a call
• Tap 📞.

To make an international call
1. From your Home screen, tap 📞.
2. Find and tap Phone.
3. Touch and hold 0 until a “+” sign appears.
4. Enter the country code, area code (without the first 0) and phone number, then tap Call.

To answer a call
• Drag presses to the right across the screen.

⚠️ If you are using regular headphones without a microphone, you have to remove the headphones from the headset connector to be able to answer the call.

To decline a call
• Drag presses to the left across the screen.
To change the ear speaker volume during a call
• Press the volume key up or down.

To turn on the loudspeaker during a call
• Tap 🎧.

To mute the microphone during a call
• Tap 🎤.

To activate the screen during a call
• Press 🏛.

To enter numbers during a call
1 During a call, tap 📞. A keypad appears.
2 Enter numbers.

To mute the ringtone for an incoming call
• When you receive the call, press the volume key.

Recent calls
In the call log, you can view recently missed 🔄, received 📩 and dialled 🗦 calls.

To view your missed calls
1 When you have missed a call, 📞 appears in the status bar. Drag the status bar downwards.
2 Tap Missed call.

To call a number from your call log
1 From your Home screen, tap 📞.
2 Find and tap Phone. The call log view appears on the upper part of the screen.
3 To call a number directly, tap the number. To edit a number before calling, touch and hold the number, then tap Edit number before call.

! You can also call a number by tapping 📞 > Call back.

To add a number from the call log to your contacts
1 From your Home screen, tap 📞.
2 Find and tap Phone. The call log view appears on the upper part of the screen.
3 Touch and hold the number, then tap Add to Contacts.
4 Tap the desired contact, or tap Create new contact.
5 Edit the contact details and tap Done.

Voicemail
If your subscription includes a voicemail service, callers can leave voice messages for you when you can’t answer calls. Your voicemail service number is normally saved on your SIM card. If not, you can get the number from your service provider and enter it manually.

To enter your voicemail number
1 From the Home screen, tap 📞.
2 Find and tap Settings > Call settings > Voicemail settings > Voicemail number.
3 Enter your voicemail number.
4 Tap OK.
To call your voicemail service
1. From your Home screen, tap 📞.
2. Find and tap Phone.
3. Touch and hold 1.

Multiple calls
If you have activated call waiting, you can handle multiple calls at the same time. When it is activated, you will be notified by a beep if you receive another call.

To activate or deactivate call waiting
1. From the Home screen, tap 📞.
2. Find and tap Settings > Call settings > Additional settings.
3. To activate or deactivate call waiting, tap Call waiting.

To reject a second call
• When you hear repeated beeps during a call, tap Busy.

To answer a second call and end the ongoing call
• When you hear repeated beeps during a call, tap End current call and answer.

To answer a second call and put the ongoing call on hold
• When you hear repeated beeps during a call, tap Answer.

To make a second call
1. During an ongoing call, tap 📞.
2. Enter the number of the recipient and tap ✆.
3. If the recipient answers, the first call is put on hold.

» The same procedure applies to subsequent calls.

To switch between multiple calls
• To switch to another call and put the current call on hold, tap the desired number or contact.

To end the ongoing call and return to the next call on hold
• Tap 📞.

Conference calls
With a conference or multiparty call, you can have a joint conversation with two or more persons.

To make a conference call
1. During an ongoing call, tap 📞.
2. Dial the number of your second participant and tap ✆.
3. If the second participant answers, the first call is put on hold.
4. Tap ✆.

» To add more participants, repeat steps 1 to 4.

To have a private conversation with a conference call participant
1. During an ongoing conference call, tap the button showing the number of participants. For example, tap 3 participants if there are three participants on the call.
2. Tap the name of the participant you want to talk to privately.
3. To end the private conversation and return to the conference call, tap ✆.
To release a participant from a conference call
1 During an ongoing conference call, tap the button showing the number of participants. For example, tap 3 participants if there are three participants.
2 Tap next to the participant you want to release.

To end a conference call
• During the call, tap .

Call settings

Barring calls
You can bar all or certain categories of incoming and outgoing calls. When you use call barring for the first time, you need to enter your PUK (Personal Unblocking Key) and then a new password to activate the call barring function.

To bar incoming or outgoing calls
1 From your Home screen, tap .
2 Find and tap Settings > Call settings > Call barring.
3 Select an option.
4 Enter the password and tap Enable.

Forwarding calls
You can forward calls, for example, to another phone number, or to an answering service.

To forward calls
1 From your Home screen, tap .
2 Find and tap Settings > Call settings > Call forwarding.
3 Select an option.
4 Enter the number you want to forward the calls to, then tap Enable.

To turn off call forwarding
1 From your Home screen, tap .
2 Find and tap Settings > Call settings > Call forwarding.
3 Select an option, then tap Disable.

Showing or hiding your phone number
You can select to show or hide your phone number on call recipients' devices when you call them.

To show or hide your phone number
1 From your Home screen, tap .
2 Find and tap Settings > Call settings > Additional settings > Caller ID.

Fixed Dialling Numbers
If you have received a PIN2 code from your service provider, you can use a list of Fixed Dialling Numbers (FDN) to restrict outgoing calls.

To enable or disable fixed dialling
1 From your Home screen, tap .
2 Find and tap Settings > Call settings > Fixed dialling numbers.
3 Tap Activate fixed dialling or Deactivate fixed dialling.
4 Enter your PIN2 and tap OK.
To access the list of accepted call recipients

1. From your Home screen, tap ☰️.
2. Find and tap **Settings** > **Call settings** > **Fixed dialling numbers** > **Fixed dialling numbers**.
Contacts

Use the Contacts application to store and manage all your numbers, email addresses, and other contact data in one place. Just tap on a contact to see all communications with that contact in one easy overview.

You can add new contacts in your phone and synchronise them with contacts saved in your Google™ account, Microsoft® Exchange ActiveSync® account, or other accounts that support synchronisation. The Contacts application automatically creates new entries and also helps you match data such as email addresses with existing entries. You can also manage this process manually. For more information, go to www.sonymobile.com.

Transferring contacts to your new phone

There are several ways to transfer contacts to your new phone. Select a transfer method that best suits your situation.

Transferring contacts using a PC

You can use a PC to transfer contacts from several phone brands, including iPhone, Samsung, HTC and Nokia.

You need:
- An Internet-connected PC running Windows®
- A USB cable for your old phone
- A USB cable for your new Android™ phone
- Your old phone
- Your new Android™ phone

If you don’t have access to all of the items listed above, go to www.sonymobile.com to find out about other ways to transfer your contacts.

Using the PC Companion program to transfer contacts

If you are transferring contacts using a PC, use the PC Companion progam. It’s free, and the installation files are already saved on your new phone. PC Companion also offers a range of other features, including help to update your phone software.

To install PC Companion
1 New phone: Turn on your new Android™ phone and connect it to a PC using a USB cable.
2 New phone: Tap Install to install PC Companion on the PC.
3 Computer: If a popup window appears, select Run Startme.exe. In the new popup window that appears, click Install to start the installation and then follow the instructions to complete the installation.

To transfer contacts to your new phone using PC Companion
1 Make sure that PC Companion is installed on your PC.
2 Open the PC Companion program on the PC, then click Contacts Setup and follow the instructions to transfer your contacts.
Transferring contacts using an Apple® Mac® computer
For detailed instructions on how to use an Apple Mac computer to transfer contacts from your old phone, go to www.sonymobile.com.

Transferring contacts using synchronisation accounts
Your phone works with popular online synchronisation accounts such as Google Sync™, Microsoft® Exchange ActiveSync® or Facebook™. If you have synced the contacts in your old phone or your computer with an online account, you can transfer your contacts to your new phone using that account. For more detailed information about synchronisation, see Synchronising data on your phone on page 70.

To synchronise your phone contacts with a synchronisation account
1 From your Home screen, tap , then tap .
2 Press , then tap Settings > Accounts & sync.
3 To set up a synchronisation account, tap Add account and follow the on-screen instructions. If you have already set up a synchronisation account and you want to sync with that account, tap the account, press , and tap Sync now.

To import contacts from a SIM card
1 From your Home screen, tap , then tap .
2 Press , then tap Import contacts > SIM card.
3 If you have set up a synchronisation account, you can choose to add the SIM card contacts under that account. Or you can choose to only use these contacts in the phone. Select your desired option.
4 To import an individual contact, find and tap the contact. To import all contacts, press , then tap Import all.

To import contacts from a memory card
1 From your Home screen, tap , then tap .
2 Press , then tap Import contacts > SD card.
3 If you have set up a synchronisation account, you can add the imported memory card contacts under that account. Or you can choose to only use the imported contacts in the phone. Select your desired option.
4 If you have more than one vCard file on the SD card, a list appears showing different batches of phone contacts, with the corresponding dates for when they were created. Select the batch you want to import.

To receive contact data sent using Bluetooth™ technology
1 Make sure you have the Bluetooth™ function turned on and your phone set to visible. If not, then you cannot receive data from other devices.
2 When you are asked to confirm whether you want to receive the file, tap Accept.
3 Drag down the Notification panel and tap the file you received to import the contact data.

To receive contacts sent using a messaging service
1 When you receive a new text message, multimedia message, or email message, open the message.
2 The received contact data appears as a vCard attachment. Tap, or touch and hold the vCard file to open a menu so you can save the contact data.
Contacts screen overview

1 Tap this icon to create a contact
2 Contact search field
3 Tap a contact to view its details
4 Icon shows the contact's status on instant messaging services
5 Tap a contact thumbnail to access the quick contact menu
6 Shortcut tabs

Managing your contacts

You can create, edit and synchronise your contacts in a few simple steps. You can select contacts saved in different accounts and manage how you display them in the phone.

If you synchronise your contacts with more than one account, you can join contacts in your phone to avoid duplicates.

⚠️ Some synchronisation services, for example, some social networking services, do not allow you to edit contact details.

To view your contacts

* From your Home screen, tap ☰ಹ, then tap ☰. Your contacts are listed here.

To select which contacts to display in the Contacts application

1 From your Home screen, tap ☰ह, then tap ☰.
2 Press ☰, then tap Filter.
3 In the list that appears, mark and unmark the desired options. If you have synchronised your contacts with a synchronisation account, that account appears in the list. You can tap the account to further expand the list of options. When you are finished, tap OK.

To add a contact

1 From your Home screen, tap ☰ഹ, then tap ☰.
2 Tap ☰.
3 If you have synchronised your contacts with one or more accounts, select the account to which you want to add this contact, or tap Phone contact if you only want to use this contact in your phone.
4 Enter or select the desired information for the contact.
5 When you are finished, tap Done.

💡 If you add a plus sign and the country code before a contact phone number, you can use the number when you make calls from other countries.
To edit a contact
1. From the Home screen, tap ☀️, then tap 📞.
2. Touch and hold the contact you want to edit, then tap Edit contact.
3. Edit the desired information. When you are finished, tap Done.

To associate a picture with a contact
1. From your Home screen, tap ☀️, then tap 📞.
2. Touch and hold the contact you want to edit, then tap Edit contact.
3. Tap 📷 and select the desired method for adding the contact picture.
4. When you have added the picture, tap Done.

💡 You can also add a picture to a contact directly from the Xperia™ Gallery application.

To view your communication with a contact
1. From the Home screen, tap ☀️, then tap 📞.
2. Tap the contact you want to view.
3. To view your communication with the contact for different media, tap or flick through the filter items at the bottom of the screen.

To delete contacts
1. From your Home screen, tap ☀️, then tap 📞.
2. Press ☑️, then tap Delete contacts.
3. Mark the contacts you want to delete, or tap Mark all if you want to delete all contacts.
4. Tap Delete > OK.

To edit contact information about yourself
1. From your Home screen, tap ☀️, then tap 📞.
2. Touch and hold Myself at the top of the contact list, then tap Edit contact.
3. Enter the new information or make the changes you want.
4. When you are done, tap Done.

Avoiding duplicate entries in the Contacts application
If you synchronise your contacts with a new account or import contact information in other ways, you could end up with duplicate entries in the Contacts application. If this happens, you can join such duplicates to create a single entry. And if you join entries by mistake, you can separate them again later.

To link contacts
1. From your Home screen, tap ☀️, then tap 📞.
2. Touch and hold the contact you want to link with another contact, then tap Link contact.
3. From the list that appears, tap the contact whose information you want to join with the first contact, then tap OK to confirm. The information from the first contact is merged with the second contact, and the first contact is no longer displayed in the Contacts list.

To separate linked contacts
1. From your Home screen, tap ☀️, then tap 📞.
2. Touch and hold the linked contact you want to edit, then tap Edit contact.
3. Tap Unlink contact.
4. Tap OK.

Favourites
You can mark contacts as favourites so that you can get quick access to them from the Contacts application.
To mark or unmark a contact as a favourite
1 From the Home screen, tap ☐, then tap ☑.
2 Tap the contact you want to add to or remove from your favourites.
3 Tap ☑.

Communicating with your contacts

To search for a contact
1 From your Home screen, tap ☐, then tap ☑.
2 Enter the first few letters of the contact name in the Search field. All contacts beginning with those letters appear.

The quick contact menu
Tap a contact’s thumbnail to view quick communication options for a particular contact. Options include calling the contact, sending a text or multimedia message, and starting a chat using the Google Talk™ application.

! For an application to appear as an option in the quick contact menu, you may need to set up the application in your phone and be logged in to the application. For example, you need to start the Gmail™ application and enter your login details before you can use Gmail™ from the quick contact menu.

Sharing your contacts

To send your business card
1 From your Home screen, tap ☐, then tap ☑.
2 Tap Myself.
3 Press ☑, then tap Send contact > OK.
4 Select an available transfer method and follow the on-screen instructions.

To send a contact
1 From your Home screen, tap ☐, then tap ☑.
2 Tap the contact whose details you want to send.
3 Press ☑, then tap Send contact > OK.
4 Select an available transfer method and follow the on-screen instructions.

To send several contacts at once
1 From your Home screen, tap ☐, then tap ☑.
2 Press ☑, then tap Send contacts.
3 Mark the contacts you want to send, or select all if you want to send all contacts.
4 Tap Send, then tap OK to confirm.
5 Select an available transfer method and follow the on-screen instructions.

Backing up contacts
You can use a memory card, a SIM card or an online synchronisation tool such as Microsoft® Exchange ActiveSync® to back up contacts.

To export all contacts to the memory card
1 From your Home screen, tap ☐, then tap ☑.
2 Press ☑, then tap Back up contacts > SD card.
3 Tap OK.
To export contacts to a SIM card

1. From your Home screen, tap ☰, then tap 📞.
2. Press ☰, then tap Back up contacts > SIM card.
3. Mark the contacts you want to export, or tap Mark all if you want to export all your contacts.
4. Tap Back up.
5. Select Add contacts if you want to add the contacts to existing contacts on your SIM card, or select Replace all contacts if you want to replace the existing contacts on your SIM card.

⚠️ When you export contacts to a SIM card, not all information may get exported. This is due to memory limitations on SIM cards.
Messaging

Using text and multimedia messaging

You can send and receive text messages from your phone using SMS (Short Message Service). If your subscription includes MMS (Multimedia Messaging Service), you can also send and receive messages that contain media files, for example, pictures and videos. The number of characters you can send in a single text message varies depending on the operator and the language you use. If you exceed the character limit, then all your single messages are linked together and sent as one message. You are charged for each single text message you send. When you view your messages, they appear as conversations, which means that all messages to and from a particular person are grouped together.

⚠️ To send multimedia messages, you need the correct MMS settings in your phone. See Internet and messaging settings on page 33.

To create and send a message

1. From your Home screen, tap 📩, then find and tap 📩.
2. Tap New message.
3. To add a recipient, tap Add recipient, then find and mark the checkbox next to the recipient name. To add more than one recipient, mark the checkboxes for the desired recipients. You can also enter the full number in the search field manually, then tap Add.
4. When you are finished adding recipients, tap Done.
5. Tap Write message and enter your message text.
6. If you want to add a media file, tap 📜 and select an option.
7. If you want to add or remove recipients before sending the message, press 📜. To add a recipient, tap Add recipient. To remove a recipient, tap Edit recipients and tap ✕ next to a recipient field. When you are finished, tap Done.
8. To send the message, tap Send.

💡 If you exit a message before sending, it gets saved as a draft. The conversation gets tagged with the word Draft:

To read a received message

1. From your Home screen, tap 📩, then find and tap 📩.
2. Tap the desired conversation.
3. If the message is not yet downloaded, tap and hold the message, then tap Download message.

💡 When you receive a text or multimedia message, ✉️ appears in the status bar. To read the message, you can also drag the status bar downwards and tap the received message when the status bar is open.

To reply to a message

1. From your Home screen, tap 📩, then tap Messaging.
2. Tap the desired conversation.
3. Enter your reply and tap Send.

To forward a message

1. From your Home screen, tap 📩, then tap Messaging.
2. Tap the desired conversation.
3. Touch and hold the message you want to forward, then tap Forward message.
4. Select a recipient from the list, or tap Add recipient to add a recipient who is not in the list.
5. Edit the message and tap Send.
To delete a message
1. From your Home screen, tap 📪, then tap Messaging.
2. Tap the desired conversation.
3. Touch and hold the message you want to delete, then tap Delete message > Yes.

To delete conversations
1. From your Home screen, tap 📪, then tap Messaging.
2. Press ⬆️, then tap Delete several.
3. Mark the checkboxes for the conversations you want to delete, then tap Delete.

To save a sender's number to a contact
1. From your Home screen, tap 📪, then tap Messaging.
2. Tap a conversation.
3. Tap the sender's number at the top of the screen.
4. Tap 📞.
5. Select an existing contact, or tap ☒️ if you want to create a new contact.
6. Edit the contact information and tap Done.

To call a message sender
1. From your Home screen, tap 📪, then tap Messaging.
2. Tap a conversation.
3. Tap the recipient name or number at the top of the screen.
4. If the recipient is saved in your contacts, tap the phone number you want to call. If you have not saved the recipient in your contacts, tap ☐️.

To save a file contained in a message you receive
1. From your Home screen, tap 📪, then tap Messaging.
2. Tap the desired conversation.
3. If the message has not been downloaded yet, tap and hold the message, then tap Download message.
4. Touch and hold the file you want to save, then select the desired option.

Text and multimedia message options

To change the notification settings for messages
1. From your Home screen, tap 📪, then tap Messaging.
2. Press ⬆️, then tap Settings.
3. If desired, tap Notification tone and select a notification sound.
4. If desired, tap Notification vibration and mark the checkbox to activate.

To change the delivery report settings for outgoing messages
1. From your Home screen, tap 📪, then tap Messaging.
2. Press ⬆️, then tap Settings.
3. Tap Delivery report to activate or deactivate the delivery report.
4. When a message has been delivered to the recipient, ✔️ appears in the message.

To view messages saved on the SIM card
1. From your Home screen, tap 📪, then tap Messaging.
2. Press ⬆️, then tap Settings > SIM messages.
Email

Use the Email application in your phone to send and receive emails through your regular email account or through your corporate account. Or you can do both. Your phone can handle several email accounts at the same time. You can set up these accounts to run through one combined inbox, or through separate inboxes. Note that emails you receive to your Gmail™ account can be accessed in the phone from both the Email and the Gmail™ applications.

Your corporate Microsoft® Outlook® email messages have to be stored on a Microsoft® Exchange server for the functionality described above to work. See Synchronising your corporate email, calendar and contacts on page 71 for more information.

To set up an email account in your phone
1. From your Home screen, tap .
2. Find and tap .
3. Enter your email address and password, then tap Next.
4. If the settings for the email account cannot be downloaded automatically, complete the setup manually. If necessary, contact your email service provider for detailed settings. For corporate email setup on your phone, select Exchange as the account type.
5. When you are prompted, enter a name for your email account, so that it is easily identifiable. The same name shows in the emails you send from this account. When you are finished, tap Next.

You can set up more than one email account. See To add an extra email account in your phone on page 52.

Using email

To create and send an email message
1. From your Home screen, tap , then find and tap . The inbox of your default email account appears. If you want to use another email account that you have set up on your phone, tap the bar containing , then select the account you want to send the message from.
2. Tap .
3. Tap To and start typing the recipient’s email address. Matches are displayed in a dynamic list. Tap the relevant match or continue typing the complete email address. To add more recipients, enter a comma (,) or a semicolon (;) and start typing another name. To delete a recipient, tap .
4. To select an email address saved in your contacts, tap , then find and mark the checkbox next to a recipient field. To add more than one recipient, mark the checkboxes for the desired recipients. When you are finished, tap Done.
5. Tap the subject field and enter the email subject.
6. To attach a file, press , then tap Attach file. Select the type of file, then tap the file you want to attach from the list that appears.
7. Tap the body text field and enter your message text.
8. To add Cc/Bcc fields, press , then tap + Cc/Bcc.
9. To send the email, tap .
To receive email messages
1. From your Home screen, tap 📧.
2. Find and tap 📧. The inbox of your default email account appears.
3. If you want to check another email account that you have set up on your phone, tap the bar containing 📧, then select the account you want to check. If you want to check all your email accounts at once, tap the bar containing 📧, then tap Combined view.
4. To download new messages, tap 📤.

Tip: If you have set up a corporate email account, you can set the check frequency to Automatic (Push).

To read your email messages
1. From your Home screen, tap 📧.
2. Find and tap 📧. The inbox of your default email account appears. If you want to check another email account that you have set up on your phone, tap the bar containing 📧, and select the account you want to check.
3. In the email inbox, scroll up or down and tap the email you want to read.
4. In the body text field, spread two fingers apart, or pinch them together, to zoom in or out.
5. Use the forward and backward arrows to read your next or previous message.

To view an email message attachment
1. From your Home screen, tap 📧.
2. Find and tap 📧. The inbox of your default email account appears. If you want to check another email account that you have set up on your phone, tap the bar containing 📧, then select the account you want to check.
3. Find and tap the desired message in your email inbox. Emails with attachments are identified by 📥.
4. Tap the attachment tab in the email body. All attachments appear in a list.
5. Tap Load below an attachment item.
6. When the attachment is downloaded, tap View or Save.

To save a sender’s email address to your contacts
1. From your Home screen, tap 📧.
2. Find and tap 📧. The inbox of your default email account appears. If you want to check another email account that you have set up on your phone, tap the bar containing 📧, then select the account you want to check.
3. Find and tap the desired message in your email inbox.
4. Tap the name of the sender.
5. Tap OK when you are prompted to add the name to your contacts.
6. Select an existing contact, or tap Create new contact if you want to create a new contact.
7. Edit the contact information and tap Done.

To reply to an email message
1. From your Home screen, tap 📧.
2. Find and tap 📧. The inbox of your default email account appears. If you want to check another email account that you have set up on your phone, tap the bar containing 📧, then select the account you want to check.
3. Find and tap the message you want to reply to, then tap 📧.
4. To reply to all, tap 📧, then tap Reply all.
5. Enter your reply, then tap 📧.
To forward an email message
1 From your Home screen, tap 📧.
2 Find and tap 📧. The inbox of your default email account appears. If you want to check another email account that you have set up on your phone, tap the bar containing ☐, then select the account you want to check.
3 Find and tap the message you want to forward.
4 Tap ☐, then tap Forward.
5 Tap To and enter the recipient’s address.
6 Enter your message text, then tap ☐.

To delete an email message
1 From your Home screen, tap 📧.
2 Tap 📧. The inbox of your default email account appears. If you want to check another email account that you have set up on your phone, tap the bar containing ☐, then select the account you want to check.
3 In your email inbox, mark the checkbox for the email you want to delete, then tap ☐.

To search for emails
1 From your Home screen, tap 📧. Then find and tap 📧. The inbox of your default email account appears. If you want to check another email account that you have set up on your phone, tap the bar containing ☐, then select the account you want to check.
2 Tap 📧.
3 Enter your search text, then tap the search key, or tap the confirm key on your keyboard.
4 The search result appears in a list sorted by date. Tap the email you want to open.

To mark a read email as unread
1 From your Home screen, tap 📧.
2 Find and tap 📧. The inbox of your default email account appears. If you want to check another email account that you have set up on your phone, tap the bar containing ☐, then select the account you want to check.
3 Mark the checkbox for the desired email, then tap ☐.

To star an email
1 From your Home screen, tap 📧.
2 Find and tap 📧. The inbox of your default email account appears. If you want to check another email account that you have set up on your phone, tap the bar containing ☐, then select the account you want to check.
3 Mark the checkbox for the email that you want to star, then tap ☐.

To unstar an email, mark it, then tap ☐.

To view all starred emails
1 From your Home screen, tap 📧, then find and tap 📧.
2 Tap ☐, then tap Starred. Starred emails from all your accounts appear in a list.

To manage your email in batches
1 From your Home screen, tap 📧, then find and tap 📧. The inbox of your default email account appears. If you want to check another email account that you have set up on your phone, tap the bar containing ☐, then select the account you want to check.
2 Mark the checkboxes for the emails you want to select.
3 When you are finished, tap one of the icons in the tool bar to, for example, move the selected emails to another folder.
To view all folders for one email account
1 From your Home screen, tap ☐, then find and tap ☐. The inbox of your default email account appears. If you want to check another email account that you have set up on your phone, tap the bar containing ☐, then select the account you want to check.
2 Tap ☐ to view all the folders in the account.

To change the inbox check frequency
1 From your Home screen, tap ☐.
2 Find and tap ☐.
3 Press ☐, then tap Settings.
4 If you are using several email accounts, tap the account you want to adjust.
5 Tap Inbox check frequency and select an option.

Using email accounts

To add an extra email account in your phone
1 From your Home screen, tap ☐.
2 Find and tap ☐.
3 Press ☐, then tap Settings.
4 Tap Add account.
5 Enter the email address and password, then tap Next.
6 If the settings for the email account cannot be downloaded automatically, complete the setup manually. If necessary, contact your email service provider for detailed settings.
7 When prompted, enter a name for your email account so that it is easily identifiable. The same name shows in the emails that you send from this account.
8 When you are finished, tap Next.

To set an email account as your default account
1 From your Home screen, tap ☐.
2 Find and tap ☐.
3 Press ☐, then tap Settings.
4 Tap the account you want to use as the default account for composing and sending emails.
5 Mark the Default account checkbox. The inbox of the default account appears every time you open the Email application.

If you only have one email account, this account is automatically the default account.

To remove an email account from your phone
1 From your Home screen, tap ☐.
2 Find and tap ☐.
3 Press ☐, then tap Settings.
4 Tap the account you want to remove.
5 Find and tap Remove account > OK.

Gmail™ and other Google™ services
If you have a Google™ account, you can use the Gmail™ application in your phone to read, write and organise email messages. After you set up your Google™ account to work in the phone, you can also chat to friends using the Google Talk™ application, synchronise your phone calendar application with your Google Calendar™, and download applications and games from Android Market™.

The services and features described in this chapter may not be supported in all countries or regions, or by all networks and/or service providers in all areas.
To set up a Google™ account in your phone

1. From your Home screen, tap 
2. Find and tap Settings > Accounts & sync > Add account > Google.
3. Follow the registration wizard to create a Google™ account, or sign in if you already have an account. Your phone is now ready to use with Gmail™, Google Talk™ and Google Calendar™.

💡 You can also sign in or create a Google™ account from the setup guide the first time you start your phone. Or you can go online and create an account at www.google.com/accounts.

To open the Gmail™ application

1. From the Home screen, tap 
2. Find and tap Gmail™.
Google Talk™

You can use Google Talk™ instant messaging in your phone to chat with friends who also use this application.

To start Google Talk™
1 From your Home screen, tap 📲.
2 Find and tap Talk.

To reply to an instant message with Talk
1 When someone contacts you on Talk, 📨 appears in the status bar.
2 Drag the status bar downwards, then tap the message and begin to chat.
Timescape™

Timescape™ collects all your communications into one integrated view. Events such as Facebook™ or Twitter™ updates appear as tiles in a chronological flow on the screen. Browse the files to get a snack-size preview of events before choosing to open them and view the full content. Timescape™ also features an infinite button that gives you access to a range of content about the item you are currently viewing.

! The services and features described in this chapter may not be supported in all countries or regions, or by all networks and/or service providers in all areas.

To start Timescape™

1. From your Home screen, tap .
2. Find and tap Timescape™.
3. If you are starting Timescape™ for the first time, tap the tile in the welcome screen to set up Timescape.
4. Tap the Services screen to log in to social networking services such as Facebook™ or Twitter™, or to search for Timescape-related extensions on Android Market™.
5. If you do not want to log in to any social networking accounts or search Android Market™, tap Done.

Timescape™ main view

To scroll through tiles in Timescape™

1. From your Home screen, tap .
2. Find and tap Timescape™.
3. Flick up or down to scroll through the tiles.

To preview a tile in Timescape™

1. From your Home screen, tap .
2. Find and tap Timescape™.
3. Scroll to the tile you want to preview, and then tap it.
Timescape™ event filter

- All events
- Missed calls
- Received text and multimedia messages
- Updates from your Twitter™ contacts
- Updates from your Facebook™ contacts

To filter the events displayed in Timescape™
1. From your Home screen, tap ⬇️.
2. Find and tap Timescape™.
3. Tap or flick through the filter icons.

To refresh the main view in Timescape™
- When the Timescape™ event filter is set to show all events, press ⬇️, then tap Refresh.
- When you refresh the main view, your phone may connect to the Internet to update information from web service accounts that you have linked to Timescape™.

To log in to Facebook™ or Twitter™ from Timescape™
1. From your Home screen, tap ⬇️.
2. Find and tap Timescape™.
3. Press ⬇️, then tap Settings > Set up services.
4. Tap the service you want to log in to.
5. Enter your login details.
- When you have logged in to a web service, you can update your status or view updates from the web service in Timescape™.

To update your Facebook™ or Twitter™ status in Timescape™
1. From your Home screen, tap ⬇️.
2. Find and tap Timescape™.
3. Tap ⬇️ > Update status.
4. Tap the service for which you want to update your status. If you are not signed in to the service, you need to sign in before proceeding. When you have selected the desired service, tap Continue.
5. Tap the text field and enter your new status, then tap Post.

To log out of Facebook™ or Twitter™ from Timescape™
1. From your Home screen, tap ⬇️.
2. Find and tap Timescape™.
3. Press ⬇️, then tap Settings > Set up services.
4. Tap the service you want to log out of.
- Your account information gets deleted when you log out.

Downloading new services for Timescape™
You can perform an extension search in Android Market™ and download new services for Timescape™. Such services include applications and plug-ins that add extra features to Timescape. For example, you can download applications that update Timescape with your activities on various social networking sites.
To download and install new services for Timescape™
1. From your Home screen, tap ⌚️.
2. Find and tap Timescape™.
3. Press ⌚️, then tap Settings > Set up services > Extension search.
4. If you don’t have a Google account set up on your phone, follow the on-screen instructions to add one. Otherwise, you are directed straight to Android Market™.
5. In Android Market™, select a service to download from the list that appears, then follow the instructions to download and install it.

💡 You can delete installed Timescape services the same way you delete any other installed application.

To view an event in Timescape™
1. From the Home screen, tap ⌚️.
2. Find and tap Timescape™.
3. Scroll to and tap the tile for the desired event so it appears in preview mode. Then tap the tile again.

The infinite button in Timescape™
When you tap a tile, the infinite button ⚫️ appears in the upper right corner. If the tile is connected to a contact, you can access related content by tapping the infinite button.

To view all communication with a contact in Timescape™
1. From your Home screen, tap ⌚️.
2. Find and tap Timescape™.
3. Tap a tile for an event related to a contact.
4. Tap ⚫️. All communication with the contact appears.
5. Tap or flick the filter items at the bottom of the screen to view communication with the contact through other media.

Timescape™ settings

To access Timescape™ settings
1. From the Home screen, tap ⌚️.
2. Find and tap Timescape™.
3. Press ⌚️, then tap Settings.

To schedule web service content updates in Timescape™
1. From your Home screen, tap ⌚️.
2. Find and tap Timescape™.
3. Press ⌚️, then tap Settings > Update mode.
4. Tap the desired option. If you select Manual, no automatic updates get scheduled.

Timescape™ widget

The Timescape™ widget shows the latest Timescape™ events. For quick access, the Timescape™ widget can be added on your Home screen. See Home screen on page 20.
Timescape™ widget view

1 Timescape™ tile
2 Tap to refresh the view
3 Shortcut to the Timescape™ main view
4 Tap to update your status

⚠️ You cannot preview tiles when using the Timescape™ widget.

To add the Timescape™ widget to your Home screen
1 From your Home screen, press 📱.
2 Tap Add > Widgets.
3 Tap Timescape™ Widget.
4 Select an item you want to add.

To remove the Timescape™ widget from your Home screen
1 From your Home screen, touch and hold the Timescape™ widget.
2 Drag the widget to 🗑️.
Getting started with Android Market™

Open Android Market™ and enter a world of applications and games. You can browse these applications and games through different categories. You can also rate an application or game and send feedback on it.

To use Android Market™, you need to have a Google™ account. See To set up a Google™ account in your phone on page 53.

Android Market™ may not be available in all countries or regions

To open Android Market™
1 From the Home screen, tap 📱.
2 Find and tap Market.

Downloading from Android Market™

You can download all kinds of applications from Android Market™, including free applications.

Before you download applications
Before you start downloading from Android Market™, make sure that you have a working Internet connection.

Also, remember that you might incur data traffic charges when you download content to your phone. Contact your operator for more information.

To download a free application
1 In Android Market™, find an item you wish to download by browsing categories, or by using the search function.
2 Tap the item to view its details, and follow the instructions to complete the installation.
3 If the application you want to download requires access to your data or control of any functions on your phone, an additional screen appears with details. Read this screen carefully because the functionality of your phone may be seriously affected if you proceed. Tap OK if you agree, or Cancel if you wish to cancel the download.

To download a paid application
1 In Android Market™, find an item you wish to download by browsing categories, or by using the search function.
2 Tap the item to view its details, and follow the instructions in your phone to complete your purchase.
3 If the application you want to download requires access to your data or control of any functions on your phone, an additional screen appears with details. Read this screen carefully because the functionality of your phone may be seriously affected if you proceed. Tap OK if you agree, or Cancel if you wish to cancel the download.

To open a downloaded application
1 In Android Market™, press 📱, then tap My Apps.
2 Tap the downloaded application.

You can also access downloaded applications from the Application screen.

Clearing your application data

You may sometimes need to clear data for an application. This might happen if, for example, the application memory becomes full, or you want to clear high scores for a
game. You might also want to erase incoming email, text and multimedia messages in some applications.

To clear all cache for an application
1. From your Home screen, tap.
2. Find and tap Settings.
3. Tap Apps.
4. Tap the application for which you want to clear all cache.
5. Tap Clear cache.

⚠️ It is not possible to clear the cache for some applications.

To delete an installed application
1. From your Home screen, tap.
2. Find and tap Settings.
3. Tap Apps.
4. Select the application that you want to delete.
5. Tap Uninstall.

⚠️ It is not possible to delete some preinstalled applications.

Permissions

Some applications need to access parts of your phone to be able to work properly. For example, a navigation application needs permissions to send and receive data traffic, and access your location. Some applications might misuse their permissions by stealing or deleting data, or reporting your location. Make sure you only install and give permissions to applications you trust.

To view permissions of an application
1. From your Home screen, tap.
2. Find and tap Settings.
3. Tap Apps.
4. Tap the desired application.
5. Scroll down to view the relevant details under Permissions.

Installing applications not from Android Market™

Installing applications of unknown or unreliable origin can damage your phone. By default, your phone is set to block such installations. However, you can change this setting and allow installations from unknown sources.

⚠️ Sony Ericsson does not warrant or guarantee the performance of any third-party applications or content transferred via download or other interface to your phone. Similarly, Sony Ericsson is not responsible for any damage or reduced performance of your phone attributable to the transfer of third-party content. Only use content from reliable sources. Contact the content provider if you have any questions or concerns.

To allow the installation of applications not from Android Market™
1. From your Home screen, tap.
2. Find and tap Settings > Security.
3. Mark the Unknown sources checkbox.
PlayNow™ service

You can use the PlayNow™ service to download applications, music, games, ringtones and wallpapers. The PlayNow™ service offers both free and non-free downloads.

⚠️ The PlayNow™ service is not available in all countries.

Before you download content

Before you download, make sure that you have an Internet connection. Also, you may need to have a memory card inserted in your phone to download content.

⚠️ When you download content to your phone, you might be charged for the amount of data transferred. Contact your operator for information about data transfer rates in your country.

To start PlayNow™

1. From the Home screen, tap 📱.
2. Find and tap 📱.

Downloading from the PlayNow™ service

Download a range of content from the PlayNow™ service direct to your phone. Choose from a variety of applications, games, music, ringtones and other content. Note that payment options for non-free applications may vary per country.

To download a PlayNow item to your phone

1. From your Home screen, tap 📱.
2. Find and tap PlayNow™.
3. Find an item you want to download by browsing categories, or by using the search function.
4. Tap the item to view its details.
5. Click “Buy now!” to start the purchase process. After your purchase has been validated, you can start to download your content.
Video Unlimited

Use the Video Unlimited service to rent and purchase videos that you can view not only on your phone, but also on your PC, PlayStation® Portable (PSP®) and PlayStation® 3. Select your pick from the latest Hollywood releases, action movies, comedies, classics, and a range of other categories.

⚠ Video Unlimited might not be available in all countries or regions.

To open Video Unlimited
1 From your Home screen, tap 📱.
2 Find and tap 📱.

Video Unlimited menu overview

- View your account information
- Search for a video
- View the download status for all your items
- View and change settings for your account, purchases, and downloads
- Add the current video to a wish list
- Delete all items in your wish list
- Delete the video you’re currently viewing from the wish list
- Share information about the current video via a social network, email, Bluetooth or other method
- View legal information

⚠ The Video Unlimited menu is dynamic, which means that all options are not always available. For example, the option to delete all items in your wish list is only available when you are viewing the list.

To open the Video Unlimited menu
• Open Video Unlimited, then press 📱.

Creating a Video Unlimited account

You need to create a Video Unlimited account if you want to buy or rent movies through the Video Unlimited service. If you already have a PlayStation® network account, then you can use that account instead.

Exploring the Video Unlimited selection

Browse videos by category, or enter text to search for a particular item. You can also choose to preview videos you’re interested in.

Renting or buying a video

When you rent a video, you have a fixed amount of time in which to view it. This time period varies from market to market. You can also choose to download a purchased video to most Sony™ devices that are connected to your Video Unlimited account.
**Video Unlimited notifications overview**

When you buy or rent videos, the following notifications may appear:

<table>

Music Unlimited

Music Unlimited is a subscription-based service that offers access to millions of songs over a 3G or Wi-Fi® connection and the opportunity to sync with your music and playlists using a Windows®-based PC. You can manage and edit your personal music library in the cloud from a variety of devices. For more information, visit www.sonyentertainmentnetwork.com.

❗ Music Unlimited might not be available in all countries or regions.

To open Music Unlimited

1. From your Home screen, tap 📲.
2. Find and tap 📲.
Getting organised

Calendar
Your phone has a calendar for managing your time schedule. If you have a Google™ account, you can also synchronise your phone calendar with your web calendar. See Synchronising data on your phone on page 70.

To set the calendar view
1. From your Home screen, tap ☂️, then find and tap Calendar.
2. Press 📆 and select an option.

To view multiple calendars
1. From your Home screen, tap ☂️, then find and tap Calendar.
2. Press 📆, then tap More > My calendars.
3. Tap to select the calendars you want to view.

To create a calendar event
1. From your Home screen, tap ☂️, then tap Calendar.
2. Press 📆, then tap New event.
3. Enter the name, time, location and description for the event.
4. If desired, select another option under Repetition.
5. Select a reminder for the event. To add a new reminder for the event, tap ☐️.
6. Tap Save.

💡 When the appointment time approaches, your phone plays a short sound to remind you. Also, 👕 appears in the status bar.

To view a calendar event
1. From your Home screen, tap ☂️, then tap Calendar.
2. Tap the event you want to view.

To change the calendar settings
1. From your Home screen, tap ☂️, then tap Calendar.
2. Press 📆, then tap More > Settings.
3. Tap to open the setting you want to change, and edit as desired.

Alarm clock
Use your phone as an alarm clock and select any sound in your phone as your alarm signal. The alarm does not sound if your phone is turned off. But it does sound when your phone is set to silent mode.

To open the alarm clock
1. From your Home screen, tap ☝️.
2. Find and tap Alarms.

💡 You can also open the alarm clock by tapping the analog clock after adding it as widget to your Home screen.

To set a new alarm
1. From your Home screen, tap ☝️.
2. Find and tap Alarms.
3. Tap Add alarm.
4. Adjust the time by scrolling up and down.
5. Tap Set.
6. If desired, edit other alarm settings.
7. Tap Done.
To edit an existing alarm
1 From your Home screen, tap ⌣. Find and tap Alarms.
2 Tap the alarm you want to edit.
3 Tap Time.
4 Scroll up or down to adjust the time.
5 Tap Set.
6 If desired, edit other alarm settings.
7 Tap Done.

! The alarm time format displayed is the same as the format you select for your general time settings, for example, 12-hour or 24-hour.

To deactivate an alarm
1 From your Home screen, tap ⌣. Find and tap Alarms.
2 Tap one of the marked alarms.
3 Unmark the Turn alarm on checkbox.

To activate an existing alarm
1 From your Home screen, tap ⌣. Find and tap Alarms.
2 Tap one of the unmarked alarms.
3 Mark the Turn alarm on checkbox.

To delete an alarm
1 From your Home screen, tap ⌣. Find and tap Alarms.
2 Tap the alarm you want to delete.
3 Tap Delete, then tap OK.

To set the ringtone for an alarm
1 From your Home screen, tap ⌣. Find and tap Alarms.
2 Tap the alarm you want to edit.
3 Tap Ringtone and select an option.
4 Tap Done.

To set a recurring alarm
1 From your Home screen, tap ⌣. Find and tap Alarms.
2 Tap the alarm you want to edit.
3 Tap Repeat.
4 Mark the checkboxes for the desired days, then tap OK.

To set the title for an alarm
1 From your Home screen, tap ⌣. Find and tap Alarms.
2 Tap the alarm you want to edit.
3 Tap Label and enter a name for the alarm.
4 Tap OK.

To activate the vibrate function for an alarm
1 From your Home screen, tap ⌣. Find and tap Alarms.
2 Tap the alarm you want to edit.
3 Mark the Vibrate checkbox.
To set alarms to sound when the phone is in silent mode

1. From your Home screen, tap 📲.
2. Find and tap Alarms, then press 📲.
3. Tap Settings.
4. Mark the Alarm in silent mode checkbox.

To snooze an alarm when it sounds
• When the alarm sounds, tap Snooze.

To turn off an alarm when it sounds
• When the alarm sounds, tap Dismiss.
Scanning with the NeoReader™ application

Use your phone as a barcode scanner to find out more about items you scan. For example, you see a coat in a magazine ad and want to find the nearest retail outlet to buy it. If the ad contains a readable barcode, the NeoReader™ application uses this code to access mobile web content, such as a web page with more product information or a map of nearby outlets. NeoReader™ supports most standard barcode types.

To start the NeoReader™ application
1. From the Home screen, tap ...
2. Find and tap NeoReader™.

To scan a barcode
1. When the NeoReader™ application is open, hold the phone camera over the barcode until the complete barcode is visible in the viewfinder.
2. The phone automatically scans the barcode, and vibrates when the barcode is recognised. If the barcode is not recognised, tap to scan the code manually.

To enter a barcode manually
1. When the NeoReader™ application is open, tap .
2. Tap the text field, then enter the numbers of the barcode.

NeoReader™ application menu overview

The following menu options are available in the NeoReader™ application:

- Capture the barcode using a higher image resolution in cases where NeoReader™ does not recognise the barcode automatically
- Enter the bar code numbers manually. This option can be used if your camera has difficulty reading the bar code
- View a list of previously scanned bar codes
- Select preferences for how you use the NeoReader™ application
- View information about the NeoReader™ application
- Read more about different bar code types, and about how to use NeoReader™
- Select your personal settings, such as language or country. This information is used to personalise bar code content
- Send a text message to invite a friend to download the NeoReader™ application
Staying fit with ANT+

ANT+ is a wireless technology that allows fitness accessories such as heart rate monitors and speed sensors to exchange data with your phone and other devices. With ANT+ you can store data from a treadmill run or a spin bike workout and keep it all in one place. You need to download an application such as iMapMyFitness so that your phone can process the ANT+ data it gathers.
Synchronising data on your phone

You can sync contacts, email, calendar events, and other information with your phone from multiple email accounts, synchronisation services and other kinds of accounts, depending on the applications installed on your phone. Synchronising your phone with other information sources is an easy and practical way to stay up to date.

You can:
- access your Gmail™, Google Calendar™, Google™ contacts, Google™ Chrome bookmarks and other Google services you use.
- access your corporate email, contacts and calendar applications.
- access your Facebook™ contacts, calendar, albums and other services you use.
- synchronise your phone with an Internet server using SyncML™.

Synchronising with Google™

Synchronise your phone with your Gmail™, Google Calendar™, Google™ contacts, Google™ Chrome bookmarks and data from other Google services you use. View and manage them from your phone just as easily as you would from a computer.

After synchronising, you can find Gmail™ in the Gmail™ application; Google Calendar™ in the Calendar application; Google™ contacts in the Contacts application; and other data in corresponding Google applications that you have installed.

To set up a Google™ account in your phone for synchronisation
1. From your Home screen, tap ☰.
2. Tap Settings > Accounts & sync.
3. Make sure that synchronisation is turned on so that applications can synchronise data automatically.
4. Tap Add account > Google.
5. Follow the registration wizard to create a Google™ account, or sign in if you already have an account.
6. Mark the Back up & restore checkbox if you want to back up data to your Google™ account, then tap Accept.
7. Tap Done.
8. Tap your newly created Google™ account, then tap the items you want to synchronise.

To synchronise manually with your Google™ account
1. From the Home screen, tap ☰.
2. Tap Settings > Accounts & sync.
3. Tap the Google™ account you want to synchronise.
4. Press ☰, then tap Sync now.

To synchronise your browser with Google™ Chrome
1. From your Home screen, tap ☰.
2. Tap Settings > Accounts & sync.
3. Tap the Google™ account, then mark the relevant checkbox to synchronise the browser.

To remove a Google™ account from your phone
1. From your Home screen, tap ☰.
2. Tap Settings > Accounts & sync.
3. Tap the Google™ account you want to remove from the accounts list.
4. Press ☰, then tap Remove account.
5. Tap Remove account again to confirm.
Synchronising your corporate email, calendar and contacts

Access your corporate email messages, calendar appointments and contacts directly from your phone. View and manage them just as easily as you would from a computer. After setup, you can find your information in the Email, Calendar and Contacts applications.

⚠️ For you to access the functionality described above, your corporate information must be stored on a Microsoft® Exchange server.

To set up corporate email, calendar and contacts in your phone

1. From your Home screen, tap 📱.
2. Tap Settings > Accounts & sync.
3. Make sure that synchronisation is turned on so that your data synchronises automatically according to the sync interval you set.
4. Tap Add account > Corporate.
5. Enter your corporate email address and password.
6. Tap Next. Your phone begins to retrieve your account information. If a failure occurs, contact your corporate network administrator for more information such as the domain name and Exchange server address.
7. Tap OK to allow your corporate server to control your phone.
8. Select what data you want to sync with the phone, such as contacts and calendar entries.
9. If desired, activate the device administrator to allow your corporate server to control certain security features in your phone. For example, allow your corporate server to set password rules and set storage encryption.
10. When the setup is done, you can enter a name for the corporate account so that it can be easily identified.

To edit the setup of corporate email, calendar and contacts

1. From your Home screen, tap 📱.
2. Tap Settings > Accounts & sync and select your corporate account.
3. Tap Account settings, then tap the corporate account that you want to edit.
4. Change the desired settings.

To set a synchronisation interval for a corporate account

1. From your Home screen, tap 📱.
2. Tap Settings > Accounts & sync and select your corporate account.
3. Tap Account settings, then tap the corporate account for which you want to set a synchronisation level.
4. Tap Inbox check frequency and select an interval option.

To remove a corporate account from your phone

1. From your Home screen, tap 📱.
2. Tap Settings > Accounts & sync, then tap your corporate account.
3. Press ️️️️, then tap Remove account.
4. Tap Remove account again to confirm.

Synchronising with Facebook™ inside your Xperia™ phone

There are two ways to use Facebook™ on your phone. Apart from using the standard Facebook application to access your online Facebook account, you can also choose to synchronise your Facebook account with your phone. To do this, you need to set up a Facebook™ inside Xperia™ account, which allows you to directly access Facebook content from a number of other applications in the phone. For example, you can make Facebook posts from Timescape™ and access your Facebook contacts, photos and calendar entries from related applications in the phone, such as the Calendar application.
To set up a Facebook™ inside Xperia™ account on your phone
1. From your Home screen, tap  ☰.
2. Tap Settings > Accounts & sync.
3. Make sure that synchronisation is turned on so that applications can synchronise data automatically.
4. Tap Add account > Facebook inside Xperia™.
5. Follow the on-screen instructions to create a Facebook™ inside Xperia™ account, or sign in if you already have an account.

You can also set up a Facebook™ inside Xperia™ account on your phone by marking the Facebook integration checkbox under Settings > Xperia™ > Facebook inside Xperia™.

To synchronise manually with your Facebook™ inside Xperia™ account
1. From your Home screen, tap  ☰.
2. Tap Settings > Accounts & sync.
3. Tap the Facebook inside Xperia™ account.
4. Press  , then tap Sync now.

To remove a Facebook™ inside Xperia™ account from your phone
! When you remove a Facebook™ inside Xperia™ account from your phone, the associated online Facebook account is not deleted and you can still access it from a computer.

1. From your Home screen, tap  ☰.
2. Tap Settings > Accounts & sync.
3. Tap the Facebook inside Xperia™ account.
4. Press  , then tap Remove account.
5. Tap Remove account again to confirm.

Synchronising using SyncML™
Synchronise your phone with an Internet server using SyncML™. View and manage contacts, calendar and bookmarks from your phone just as easily as you would from a computer.

To set up a SyncML™ account in your phone
1. From your Home screen, tap  ☰.
2. Find and tap Settings > Accounts & sync.
3. Make sure that synchronisation is turned on so that your data synchronises automatically according to the interval you set.
4. Tap Add account > SyncML.
5. Tap the account, server address, username and password fields, and enter the information required.
6. Tap Sync interval and select how often you want the phone to synchronise automatically.
7. Tap an item that you want to synchronise, for example, contacts. Then enter the server address, username, and password. Repeat this step for each item you want to synchronise.
8. When you're finished, tap Done.

! Contact your SyncML™ service provider for more information about your account settings.

To synchronise manually with your SyncML™ account
1. From your Home screen, tap  ☰.
2. Tap Settings > Accounts & sync.
3. Tap the SyncML™ account that you want to synchronise.
4. Press  , then tap Sync now.
To set a synchronisation interval
1. From your Home screen, tap 📱.
2. Tap Settings > Accounts & sync, then tap your SyncML™ account.
3. Tap Account settings.
4. Tap Sync interval and select an interval option.

To remove a SyncML™ account from your phone
1. From your Home screen, tap 📱.
2. Tap Settings > Accounts & sync, then tap your SyncML™ account.
3. Press 📱, then tap Remove account.
4. Tap Remove account again to confirm.
Connecting to wireless networks

You can access the Internet wirelessly from your phone using Wi-Fi® technology. This way you can browse the web and access cheaper call and data rates.

If your company or organisation has a virtual private network (VPN), you can connect to this network with your phone. You can use a VPN to access intranets and other internal services at your company.

**Wi-Fi®**

Using Wi-Fi® technology you can access the Internet wirelessly with your phone. To access the Internet using a Wi-Fi® connection, you first need to search for and connect to an available Wi-Fi® network. The signal strength of the Wi-Fi® network may differ depending on your phone’s location. Moving closer to the Wi-Fi® access point may increase the signal strength.

**Before using Wi-Fi®**

To browse the Internet using a Wi-Fi® connection, you need to search for and connect to an available Wi-Fi® network and then open the Internet browser. The signal strength of the Wi-Fi® network may differ depending on your phone’s location. Move closer to the Wi-Fi® access point to increase the signal strength.

**To turn on Wi-Fi®**

1. From your Home screen, tap ⚫.
2. Find and tap **Settings**.
3. Tap 〇 beside **Wi-Fi** so that 〇 changes to |. The phone scans for available Wi-Fi® networks.

⚠️ It may take a few seconds before Wi-Fi® is enabled.

**To connect to a Wi-Fi® network**

1. From the Home screen, tap ⚫.
2. Find and tap **Settings**.
3. Make sure that the Wi-Fi® function is on. Tap **Wi-Fi**.
4. Available Wi-Fi® networks are displayed. The available networks may be open or secured. Open networks are indicated by ☑ and secured networks are indicated by ☑ next to the Wi-Fi® network name.
5. Tap a Wi-Fi® network to connect to it. If you are trying to connect to a secure Wi-Fi® network, you are asked to enter a password. ☑ is displayed in the status bar once you are connected.

⚠️ Your phone remembers Wi-Fi® networks you connect to. The next time you come within reach of a previously connected Wi-Fi® network, your phone automatically connects to it.

💡 In some locations, open Wi-Fi® networks require you to log in to a web page before you can get access to the network. Contact the relevant Wi-Fi® network administrator for more information.

**To connect to another Wi-Fi® network**

1. From your Home screen, tap ⚫.
2. Find and tap **Settings > Wi-Fi**. Detected Wi-Fi® networks are displayed.
3. Tap another Wi-Fi® network to connect to it.

**To scan for Wi-Fi® networks manually**

1. From your Home screen, tap ⚫.
2. Find and tap **Settings > Wi-Fi**.
3. Tap **Scan**. The phone scans for Wi-Fi® networks and displays available networks in a list.
4. Tap a Wi-Fi® network in the list to connect to it.
Advanced Wi-Fi® settings
Before you add a Wi-Fi® network manually, you need to turn on the Wi-Fi® setting in your phone.

Wi-Fi® network status
When you are connected to a Wi-Fi® network or when there are Wi-Fi® networks available in your vicinity, it is possible to see the status of these Wi-Fi® networks. You can also enable the phone to notify you whenever an open Wi-Fi® network is detected.

To enable Wi-Fi® network notifications
1. Turn on Wi-Fi®, if it is not already on.
2. From your Home screen, tap Settings > Wi-Fi.
3. Press.
4. Tap Advanced.
5. Mark the Network notification checkbox.

To add a Wi-Fi® network manually
1. From the Home screen, tap Settings > Wi-Fi.
2. Tap Add network.
3. Enter the Network SSID for the network.
4. Tap the Security field to select a security type.
5. If required, enter a password.
6. Tap Save.

Contact your Wi-Fi® network administrator to get the Network SSID name and password.

To view detailed information about a connected Wi-Fi® network
1. From the Home screen, tap Settings > Wi-Fi.
2. Tap the Wi-Fi® network that you are currently connected to. Detailed network information is displayed.

Wi-Fi® sleep policy
By adding a Wi-Fi® sleep policy, you can specify when to switch from Wi-Fi to mobile data.

If you are not connected to a Wi-Fi® network, the phone uses mobile data connection to access the Internet (if you have set up and enabled a mobile data connection in your phone).

To add a Wi-Fi® sleep policy
1. From the Home screen, tap Settings > Wi-Fi.
2. Press.
3. Tap Advanced.
4. Tap Keep WiFi on during sleep.
5. Select an option.

Connected devices
Share media files in your phone with other devices over a shared Wi-Fi® connection. When your phone is connected to your home network via Wi-Fi® and has the Connected devices function turned on, other client devices connected to the same home network can access media files saved on your phone. For example, you can view photos or play a music track on a connected client device. A connected client device can be, for example, a computer with client software, a camera, TV, or a PlayStation®3. All devices must be DLNA Certified™ by the Digital Living Network Alliance.
To use the Connected devices function

1. Connect your phone to a Wi-Fi® network.
2. From your Home screen, tap ☰, then find and tap Connected devices.
3. Tap ☰ beside Change server name and edit your phone name if needed. This name will later appear on other client device(s) connected to the Wi-Fi network, to identify your phone.
4. Mark the Share content checkbox. ⚫ appears in the status bar. Your phone can now work as a media server.
5. Connect your computer or other client devices to the same Wi-Fi® network.
6. Activate client software installed on your computer. Find and select your phone as the server.
7. A notification appears in the status bar of the phone. Tap it and set access permissions.
8. Transfer to and show your phone content on client devices. It may take a couple of minutes to show all the content on the client devices if many photo or music files are saved on the phone.
9. To close the Connected devices view, press ☰. The Connected devices function stays running in the background.
10. To disconnect from the server, go to the Connected devices view in the phone and unmark the Share content checkbox.

A client device for which you have already set access permissions is a registered client device and is displayed in the Registered devices list. A client device that is waiting for you to grant access permissions is displayed in the Pending devices list.

! The instructions described above may differ depending on the client devices. Also refer to your client device User guide. If the device cannot connect, check that your home network is working.

To set access permissions for a pending client device

1. From your Home screen, tap ☰, then find and tap Connected devices.
2. Select a client device from the Pending devices list.
3. Select an access permission level.

To change the name of a registered client device

1. From your Home screen, tap ☰, then find and tap Connected devices.
2. Select a client device from the Registered devices list, then select Change name.
3. Enter a new name for the client device.

To change the access level of a registered client device

1. From the Home screen, tap ☰, then find and tap Connected devices.
2. Select a client device from the Registered devices list.
3. Tap Change access level and select an option.

To get help about sharing content with other devices

* When the Connected Devices view is open, press ☰, then tap Help.

Sharing your phone’s mobile data connection

You can share your phone’s mobile data connection with a single computer using a USB cable. This process is called USB tethering. You can also share your phone’s data connection with up to eight devices at once, by turning your phone into a portable Wi-Fi® hotspot.

When your phone is sharing its data connection, the following icons may appear in the status bar or in the Notification panel:

- **USB tethering is active**
- **Portable Wi-Fi® hotspot is active**
- **Both USB tethering and portable hotspot are active**
To share your phone’s data connection using a USB cable

1. Deactivate all USB cable connections to your phone.
2. Using the USB cable that came with your phone, connect your phone to a computer.
3. From your Home screen, tap 📱.
4. Find and tap Settings > More... > Tethering & portable hotspot.
5. Mark the USB tethering checkbox. The phone starts sharing its mobile network data connection with the computer over the USB connection. An ongoing notification appears in the status bar and the Notification panel.
6. Unmark the USB tethering checkbox, or disconnect the USB cable to stop sharing your data connection.

⚠️ You cannot share your phone’s data connection and SD card over a USB cable at the same time. For more information, see Connecting your phone to a computer on page 116.

💡 You may need to prepare your computer to establish a network connection via USB cable. Go to android.com/tether to get the most current information.

To share your phone’s data connection as a portable Wi-Fi® hotspot

1. From the Home screen, tap 📱.
2. Find and tap Settings > More... > Tethering & portable hotspot.
3. Tap Configure WiFi hotspot.
4. Enter the Network SSID for the network. Tap the Security field to select a security type.
5. If required, enter a password.
6. Tap Save.
7. Mark the Portable WiFi hotspot checkbox. The phone starts broadcasting its Wi-Fi® network name (SSID). You can now connect to this network with up to 8 computers or other devices.
8. Unmark the Portable WiFi hotspot checkbox when you want to stop sharing your data connection via Wi-Fi®.

To rename or secure your portable hotspot

1. From the Home screen, tap 📱.
2. Find and tap Settings > More... > Tethering & portable hotspot.
3. Tap Configure WiFi hotspot.
4. Enter the Network SSID for the network.
5. To select a security type, tap the Security field.
6. If required, enter a password.
7. Tap Save.

Virtual private networks (VPNs)

Use your phone to connect to virtual private networks (VPNs), which allow you to access resources inside a secured local network from outside the actual network. For example, VPN connections are commonly used by corporations and educational institutions for users who need to access intranets and other internal services when they are outside of the internal network, for example, when they are travelling.

VPN connections can be set up in many ways, depending on the network. Some networks may require you to transfer and install a security certificate in your phone. See Connecting your phone to a computer on page 116 for more information on how to transfer content to your phone. For detailed information on how to set up a connection to your virtual private network, please contact the network administrator of your company or organisation.
To add a virtual private network
1. From your Home screen, tap.
2. Find and tap Settings > More... > VPN.
3. Tap Add VPN network.
4. Select the type of VPN to add.
5. Enter your VPN settings.
6. Tap Save.

To connect to a virtual private network
1. From your Home screen, tap.
2. Find and tap Settings > More... > VPN.
3. In the list of available networks, tap the VPN that you want to connect to.
4. Enter the required information.
5. Tap Connect.

To disconnect from a virtual private network
1. Drag the status bar downwards.
2. Tap the notification for the VPN connection to turn it off.
Web browser

Use your web browser to view and navigate web pages, add pages as bookmarks, and save pages for offline viewing. You can open up to 16 windows at the same time and switch among them easily. You can also request the desktop version of a web page if you don’t want to view the mobile version.

To open the web browser
1. From your Home screen, tap 🎞.
2. Find and tap 🌐.

Browsing the web

Search and address bar
Use the search and address bar to browse the web.

1. View the download progress of the current web page
2. Enter a search word to search for a web page, or enter a web page address to load a web page
3. Cancel the download of the current web page

 иногда the search and address bar is not displayed after a web page finishes downloading. It appears again if you flick downwards on the screen.

To go to a web page
1. Tap the search and address text field to activate the keypad.
2. Enter a web address.
3. Tap Go.

To search a web page
1. Tap the search and address text field to activate the keypad.
2. Enter a search word.
3. Tap Go.

To exit the web browser
• While browsing, press 🏡.

sometimes the browser appears exactly as it did before you exited. For example, the same number of windows will be open.

Navigating web pages

To select a link
• To select a link in a web page, tap the link. The selected link gets highlighted, and the web page starts to load after you release your finger.

• If you select a link by mistake before releasing your finger, you can drag your finger away from the link to deselect it.

To go to the previous page while browsing
• Press ⬗️.
To zoom in or out on a web page
Use one of the following methods to zoom in or out on a web page:
• Double-tap to zoom in on the web page, or double-tap again to zoom out.
• Touch an area of the page with two fingers at once and spread them apart to zoom in, or pinch them together to zoom out.

To reload the current web page
• Press  three dots, then tap Refresh.

To save a web page for offline viewing
1 After the web page has loaded, press  three dots.
2 Tap Save for offline reading. You are then directed to the Saved pages tab, where you can view all saved web pages.

! If the memory card is not available, the web page cannot be saved.

To view a previously saved web page
1 When the browser is open, flick downwards on the screen to make the search and address bar appear.
2 Tap  three dots next to the search and address bar.
3 Tap  star, then tap the Saved pages tab.
4 Find and select a web page that you want to view.

To load the live version of an offline web page
1 When an offline web page is open, press  three dots.
2 Tap Go live.

To request the desktop version of a web page
1 While browsing the web page, press  three dots.
2 Tap Request desktop site.

! Once you choose to view the desktop version of a web page in a window, any other web pages that you view later in the same window will also show their desktop versions. Tap Request desktop site again to change the setting back.

To share a link to the current web page
1 While browsing, press  three dots.
2 Tap Share page.
3 Select an available transfer method, then follow the on-screen instructions.

To close a browser window
1 When the browser is open, flick downwards on the screen to make the search and address bar appear.
2 Tap  three dots next to the search and address bar. A list of all open windows appears.
3 Tap  close button in the window you want to close, or flick the window left or right off the screen to close it.

Managing bookmarks
Bookmarks let you access your favourite and frequently visited web pages quickly. You can add bookmarks directly from your phone browser. You can also synchronise your phone browser with Google™ Chrome bookmarks that you have synchronised to your Google account using a computer. See To synchronise your browser with Google™ Chrome on page 70.

Depending on your network operator, some bookmarks may be pre-installed on your phone.
To bookmark a web page
1 While you are viewing the web page, press .
2 Tap Save to bookmarks.
3 If desired, edit the bookmark.
4 When you’re done, tap OK.

To open a bookmark
1 When the browser is open, flick downwards on the screen to make the search and address bar appear.
2 Tap next to the search and address bar, then tap . The names of any accounts that you have synchronised with Google™ Chrome are displayed. Bookmarks that you have saved directly on the phone are listed under the Local account.
3 To show an account’s bookmarks, tap the account. All bookmarks in the account are displayed.
4 To open a bookmark, tap it.

To edit a bookmark
1 When the browser is open, flick downwards on the screen to make the search and address bar appear.
2 Tap next to the search and address bar, then tap .
3 Touch and hold a bookmark.
4 In the menu that appears, tap Edit bookmark.
5 Edit the bookmark as desired.
6 When you’re done, tap OK.

To add a bookmarked web page to your Home screen
1 When the browser is open, flick downwards on the screen to make the search and address bar appear.
2 Tap next to the search and address bar, then tap .
3 Tap and hold a bookmark that you want to add to your Home screen.
4 In the menu that appears, tap Add shortcut to home.

To delete a bookmark
1 When the browser is open, flick downwards on the screen to make the search and address bar appear.
2 Tap next to the search and address bar, then tap .
3 Touch and hold a bookmark.
4 In the menu that appears, tap Delete bookmark to delete the selected bookmark.

To bookmark a previously visited web page
1 When the browser is open, flick downwards on the screen to make the search and address bar appear.
2 Tap next to the search and address bar, then tap .
3 Tap the History tab, then tap one of the down arrows to view a list of previously visited web pages.
4 Tap beside the web page that you want to add as a bookmark.
5 If desired, edit more detailed information such as the name and location of the bookmark.
6 When you’re done, tap OK.
Managing text and images

To find text within a web page
1. When you are viewing a web page, press 📦.
2. Tap Find on page.
3. Enter your search text. Characters that match your search get highlighted on the web page.
4. Tap the up or down arrows to go to the previous or next highlighted item.
5. Tap ✓ to close the search bar.

To copy text from a web page
1. Touch and hold part of the text you want to copy until it becomes highlighted. Tabs appear at each end of the selection. Drag the tabs accordingly to select all the text that you want to copy.
2. Tap ☑️, then tap Copy.
3. To paste text into an email, text message or multimedia message, touch and hold the text field in the relevant application and tap Paste in the menu that appears.

If the text that you want to copy is part of a link to another web page, a menu appears in which you need to tap Select text before you can continue.

To save an image from a web page
1. On the active web page, touch and hold the desired image until a menu appears.
2. Tap Save image.

If the memory card is not available, the image cannot be saved.

Multiple windows

Your browser can run up to 16 different windows at the same time. You can, for example, log in to your webmail in one window and read the daily news in another. You can easily switch from one window to another. If you want to browse the web with more privacy, you can use the incognito tab to open a window that saves no personal information or cookies while you’re connected through it.

To open a new browser window
1. When the browser is open, flick downwards on the screen to make the search and address bar appear.
2. Tap ☑️ next to the search and address bar, then tap ✓.

To open an incognito window
1. When the browser is open, flick downwards on the screen to make the search and address bar appear.
2. Tap ☑️ next to the search and address bar.
3. Press ☐️, then tap New incognito tab.

To open a link in a new browser window
1. Touch and hold a link until a menu appears.
2. Tap Open in new tab.

To switch between browser windows
1. When the browser is open, flick downwards on the screen to make the search and address bar appear.
2. Tap ☑️ next to the search and address bar.
3. Scroll up and down to browse a list of all open windows.
4. Tap the window that you want to switch to.
Downloading from the web

You can download applications and content when you browse the web using the web browser in your phone. Usually you have to touch a download link for the desired file and the download then starts automatically.

To view your downloaded files
1. Make sure that you have inserted a memory card in your phone before viewing any previously downloaded files (to the card).
2. From your Home screen, tap Downloads.

To cancel an ongoing download
1. When your phone starts downloading a file, drag down the status bar and tap the file you are downloading.
2. Mark the checkbox beside the downloading file that you want to cancel.
3. Tap Download.

Browser settings

You can change the browser settings and customise your browser view. For example, you can change the size of the text displayed to suit your needs, or you can clear cache, cookies, browser history, and other data linked to the websites you visit.

To change your browser settings
1. When the browser is open, press Settings.
2. Tap Settings.

To change the text size on web pages
1. When the browser is open, press Settings.
2. Tap Settings > Accessibility.
3. Adjust the text size settings as desired.

To clear the cache memory from your phone
1. When the browser is open, press Settings.
2. Tap Settings > Privacy & security.
3. Tap Clear cache, then tap OK to confirm.

To clear your browser cookies
1. When the browser is open, press Settings.
2. Tap Settings > Privacy & security.
3. Tap Clear all cookie data, then tap OK to confirm.

To clear your browser history
1. When the browser is open, press Settings.
2. Tap Settings > Privacy & security.
3. Tap Clear history, then tap OK to confirm.

Auto-fitting web pages

Your browser has an auto-fit option which makes it easier to read large web pages with lots of text and images, such as news pages. When this option is enabled, your browser automatically refits images and columns of text on the screen when you double-tap the screen directly after zooming with your fingers. If auto-fit is disabled, you may need to scroll sideways to read a full sentence.

To auto-fit web pages
1. When the browser is open, press Settings.
2. Tap Settings > Advanced > Auto-fit pages.
Auto-filling text

Auto-filling allows you to automatically enter data such as names and addresses on various web forms, so you don’t have to enter the same information repeatedly on different web pages.

To create text for auto-filling
1. When the browser is open, press 📱.
2. Tap Settings > General.
3. Mark the Form auto-fill checkbox, if it is not already marked.
4. Tap Auto-fill text, then enter text that you want to use for auto-filling on web forms, for example, your name and address.
5. When you’re done, tap Save.

Plug-in settings

You can adjust how a plug-in functions on a web page. For example, you can enable plug-ins to get optimal visual effect when you view a web page. Alternatively, to increase browsing speed, you can configure your browser to only run plug-ins on demand, or you can disable plug-ins completely.

To enable plug-ins on demand
1. When the browser is open, press 📱.
2. Tap Settings > Advanced > Enable plug-ins.
3. Mark the On demand checkbox.

💡 You may need to restart your browser for the setting to take effect.
Music

Get the most out of your music player. Listen to and organise music, audio books and podcasts that you have transferred to your memory card from a computer, or purchased and downloaded from online stores.

To make content easily available to the music player, you can use the Media Go™ application. Media Go™ helps transfer music content between a computer and a phone. For more information, see Connecting your phone to a computer on page 116.

Copying media files to your memory card

Copy all your favourite media content from computer to phone and start using your phone's entertainment features to the full. It’s easy to transfer music, photos, videos and other files. Just connect your phone to a computer with a USB cable and use one of the following methods:

- Use a file manager application, for example, Windows Explorer.
  See To transfer content between a phone and computer using a USB cable on page 116
- Use the Media Go™ computer application.
  See Media Go™ on page 117

See Connecting your phone to a computer on page 116 for more general information about connecting your phone and transferring files.

Using the music player

To play audio content

1. From your Home screen, tap Media > ▶️ to open the music player. If ▶️ is not displayed, tap 📈, then find and tap ▶️.
2. Tap 📊 to open the music library.
3. Tap 🎼 to browse audio by artist. Tap 🏮 to browse by album. Tap 🎵 to browse by playlist. Tap 🎵 to browse audio by track.
4. To browse to a track, scroll up or down.
5. Tap a track to play it.
Music player overview

- Browse the music on your memory card
- Tap the infinite button to find related information online
- Cover art (if available)
- Go to the previous track in the current play queue, or rewind
- Play/Pause button
- Progress indicator – drag or tap to fast forward and rewind
- Elapsed time of current track
- Go to the next track in the current play queue, or fast forward
- View the current play queue

**To change tracks**
- In the music player, tap 🎧 or 🎧.

**To pause a track**
- In the music player, tap 🎧.

**To fast forward and rewind music**
- In the music player, touch and hold 🎧 or 🎧.
- You can also drag the progress indicator marker right or left.

**To adjust the audio volume**
- When the music player is playing a track, press the volume key.

**To improve the sound with the equalizer**
1. When the music player is open, press 🎧.
2. Tap Equalizer.
3. Select a music style.
To view a current play queue
• In the music player, tap "Play Queue".

To minimise the music player
• When the music player is playing, press "to go to the previous screen, or press "to go to the Home screen. The music player stays playing in the background.

To return to the music player when it is playing in the background
1 Drag the status bar downwards to open the Notification panel.
2 Tap the track title to open the music player.
💡 Alternatively, you can press and hold " and then tap " to return to the music player.

To delete a track
1 Open the music player library and browse to the track you want to delete.
2 Touch and hold the track title, then tap "Delete".
💡 You can also delete albums this way.

To delete one or more tracks at the same time
1 In the music player, tap ".
2 Press ".
3 Tap "Delete several".
4 Select one or more tracks that you want to delete.
5 Tap "Delete".

To share a track
1 When browsing your tracks in the music player library, touch and hold a track title.
2 Tap "Send".
3 Select an available transfer method, and follow the on-screen instructions.
💡 You can also share albums and playlists this way.

To share one or more tracks at the same time
1 When browsing your tracks in the music player library, press ".
2 Tap "Send several".
3 Tap one or more tracks that you want to share.
4 Tap "Send".
5 Select an available transfer method, and follow the on-screen instructions.
⚠ You might not be able to copy, send or transfer copyright-protected items.

To recommend a track on Facebook™
1 While the track is playing in the music player, tap " to show that you "Like" it on Facebook™. If desired, add a comment in the comments field.
2 Tap "Share" to send the track to Facebook™. If the track is received successfully, you will get a confirmation message from Facebook™.

Music player widget
The music player widget is a miniature application that gives you direct access to the music player from your Home screen. You need to add this widget to your Home screen before you can use it.
To add the music player widget to your Home screen

1. From your Home screen, press 📀.
2. Tap Add > Widgets.
3. Tap Music player.

Discovering related audio content

In the music player, you can discover audio content that is related to the artist you are listening to by tapping the Infinite button 🖉.

You can also search for audio content related to a particular artist while you are browsing the music player. The music player searches for and lists the following types of results:

- Music videos on YouTube™
- Artist info on Wikipedia
- Lyrics on Google
- Karaoke videos on YouTube™
- Extension searches on the web

Playing music in random order

You can play tracks in playlists in random order. A playlist can be, for example, a playlist you have created yourself or an album.

To play tracks in random order

1. In the music player, tap 🎼.
2. Tap 🎼 and navigate to an album, or tap 🎼 and browse to a playlist.
3. Open the album or playlist by tapping its name.
4. Tap 🎼.

💡 You can also tap 🎼 and shuffle all tracks in the list.

Playlists

The music player automatically creates Smart playlists on the playlist tab 🎼 in the music player library. The music player also creates a playlist (called Most played) of the most played songs of each artist in your audio library. You can create your own playlists from the music on your memory card.

In addition, you can copy playlists from a computer to the memory card if you have the Media Go™ application installed on the computer. When you connect and mount your phone to the computer using a USB cable connection, your memory card appears in the Media Go™ application on the computer. For more information, see Connecting your phone to a computer on page 116.

To play smart playlists

1. In the music player, tap 🎼.
2. Tap 🎼.
3. Under Smart playlists, tap a playlist.
4. Tap a track to play it.

To play the most played songs of an artist

1. In the music player, tap 🎼.
2. Tap 🎼 and tap an artist.
3. Tap Top tracks. Up to ten tracks by the artist are displayed.
4. Tap a track to play it.
To create your own playlist
1 In the music player, tap \( \text{F} \).
2 To add an artist, album or a track to a playlist, touch and hold the name of the artist or the title of the album or track to open a menu.
3 Tap Add to playlist > Create new playlist.
4 Enter a name for the playlist and tap OK. You have now created a playlist and added an artist, an album or a track to that playlist. View your playlists by tapping \( \text{F} \) in the music player library.

To add tracks to a playlist
1 When browsing the music player library, touch and hold the name of the artist or the title of the album or track you want to add.
2 Tap Add to playlist.
3 Tap the name of the playlist to which you want to add the artist, album or track. The artist, album or track is added to the playlist.

To play your own playlists
1 In the music player, tap \( \text{F} \).
2 Tap \( \text{F} \).
3 Under My playlists, tap a playlist.
4 Tap a track to play it.

To remove a track from a playlist
1 In a playlist, touch and hold the title of the track you want to delete.
2 Tap Delete from playlist.

To delete a playlist
1 In the music player, tap \( \text{F} \), then select Playlists.
2 Touch and hold the playlist you want to delete.
3 Tap Delete.
4 Tap Delete again to confirm.
Identifying music using TrackID technology

Use the TrackID™ music recognition service to identify a music track you hear playing in your surroundings. Just record a short sample of the song and you’ll get artist, title and album info within seconds. You can purchase tracks identified by TrackID™ and you can view TrackID charts to see what TrackID users around the globe are searching for. For best results, use TrackID™ technology in a quiet area. If you have problems using this application, see I cannot use Internet-based services on page 134.

⚠️ The TrackID™ application and the TrackID™ service are not supported in all countries/regions, or by all networks and/or service providers in all areas.

To open the TrackID™ application
1 From your Home screen, tap 📱.
2 Find and tap TrackID™ 🎵.

💡 You can also use the TrackID™ widget to open the TrackID™ application.

To search for track information using TrackID™
1 When the TrackID™ application is open, hold the phone towards the music source.
2 Tap Record. If the track is recognised by the TrackID™ service, the results appear on the screen.

To view TrackID™ charts
1 When the TrackID™ application is open, tap the 📊 tab. The first time you view a chart, it is set to your own region.
2 To see charts of the most popular searches in other regions, tap 📊 > Regions.
3 Select a country or region.

Using TrackID™ technology results

Track information appears when the TrackID™ application recognises a track. You can select to purchase the track or share it using email or SMS. You can also get more information about the track’s artist.

To buy a track using TrackID™ technology
1 When the TrackID™ application is open, tap a track title.
2 In the track information screen, tap Download.
3 Follow the instructions in your phone to complete your purchase.

⚠️ The track purchase feature may not be supported in all countries/regions, or by all networks and/or service providers in all areas.

To share a track using email or SMS
1 When the TrackID™ application is open, tap a track title.
2 Select a sharing method.
3 Follow the instructions in your phone to complete the procedure.

To view the artist information for a track
1 When the TrackID™ application is open, tap a track title.
2 Tap Artist info.
To delete a track from the track history
1. When the TrackID™ application is open, tap a track title.
2. Tap Delete.
3. Tap Yes in the popup window.

Using TrackID™ to identify tracks on the FM Radio
You can use TrackID™ technology to identify music tracks as they play on your phone’s FM radio and share them on Facebook.

To identify a track on the FM radio using TrackID™
1. Connect a wired handsfree or a set of headphones to your phone.
2. From your Home screen, tap 🎧.
3. Find and tap FM radio 📻. The available channels appear as you scroll through the frequency band.
4. While a song is playing on the FM radio, tap 🎵.
5. The TrackID™ application samples the song. If the track is recognised, you are presented with a track result.

⚠️ This feature may not be supported in all countries/regions, or by all networks and/or service providers in all areas.
FM radio

You can browse and listen to FM radio stations, and save them as favourites. You can listen to the radio either through a portable handsfree or headphones, or through the speaker in the phone. You have to connect a portable handsfree or headphones, as they work as the antenna for the FM radio. When you open the FM radio, available channels appear automatically. If a channel has RDS information, it appears a few seconds after you start listening.

To start the FM radio
1. Connect a portable handsfree or a set of headphones to your phone.
2. From your Home screen, tap 🎧.
3. Find and tap FM radio 📻. The available channels appear as you scroll through the frequency band.

⚠️ You have to connect a portable handsfree or headphones, which function as an antenna.

FM radio overview

1. Move upwards to the previous favourite (available when favourites are saved)
2. The tuned frequency
3. Save or remove a channel as a favourite
4. Move downwards to the next favourite (available when favourites are saved)
5. A saved favourite channel
6. Radio on/off key
7. RDS (Radio Data System) information – not available in all countries/regions
8. Open the TrackID™ application

Moving between radio channels

You can move between radio channels along a frequency band by:
• Flicking up and down.
• Dragging.
• Tapping a channel or, if available, the RDS information (station identification).

Using your favourite radio channels

You can save the radio channels you most frequently listen to as favourites. By using favourites you can quickly return to a radio channel.
To save a channel as a favourite
1 When the radio is open, navigate to the channel that you want to save as a favourite.
2 Tap ．

To remove a channel as a favourite
1 When the radio is open, navigate to the channel that you want to remove as a favourite.
2 Tap ．

To move between favourite channels
• When the radio is open, tap ． or ．
  ! To move between favourites, you need to save at least two channels as favourites.

Making a new search for radio channels
If you have moved to a new location or the reception has improved in your current location, you can start a new scan for radio channels.
  ! Any favourites you have saved are not affected by a new scan.

To start a new search for radio channels
1 When the radio is open, press ．
2 Tap Search for channels. The radio scans the whole frequency band, and all available channels are displayed.

Switching between the speaker and the handsfree
You can choose to listen to the radio either through the portable handsfree or headphones, or through the speaker in the phone.

To switch between the speaker and handsfree
1 When the radio is open, press ．
2 Tap Play in speaker.
3 To play the sound through the portable handsfree or headphones again, press ． and tap Play in handsfree.

Identifying radio tracks using TrackID™
Use TrackID™ technology to identify music tracks as they play on your phone’s FM radio.

To identify a song on the FM radio using TrackID™
1 While the song is playing on your phone’s FM radio, tap ．
2 A progress indicator appears while the TrackID™ application samples the song. If successful, you are presented with a track result, or a list of possible tracks.
3 Press ． to return the FM Radio.
  ! The TrackID™ application and the TrackID™ service are not supported in all countries/regions, or by all networks and/or service providers in all areas.
Taking photos and recording videos

Your phone camera is equipped with the highly sensitive Exmor R sensor, which enables sharp photos and videos even in low lighting conditions. With your phone camera, you can take regular 2D photos or you can shoot 3D photos in 3D Sweep Panorama™ mode. Send your photos and videos to friends as multimedia messages, or upload them to a web service.

Camera controls overview

1. Camera key – Activate the camera/Take photos/Record videos
2. Switch between still and video camera
3. Display all settings
4. Take photos or record video clips
5. Go back a step or exit the camera
6. View photos and videos
7. Camera setting icons
8. Zoom in or out
9. Main camera screen

To open the camera
- When the screen is active, press and hold down the camera key.

To close the camera
- Press ◀ from the main camera screen.

Using the still camera

There are three ways to take photos with the still camera. You can press the camera key, tap the on-screen camera button, or touch a spot on the screen.

To take a photo using the camera key
1. Activate the camera.
2. If the still camera is not selected, drag ◀ to ◆.
3. Press the camera key halfway down to activate auto-focus.
4. When the focus frame or frames are green, press the camera key fully down.
To take a photo by touching the screen
1. Activate the camera.
2. If the still camera is not selected, drag 📷 to 📸.
3. To display all settings, press 📊.
4. Tap Capturing method and select Touch capture if it is not already selected.
5. Point the camera towards the subject.
6. To activate auto focus, touch and hold a spot on the screen. When the focus frame turns green, lift your finger to take the photo.

⚠️ Be careful not to touch 📷, 📸 or other icons when touching the screen to take a photo.

To take a photo by tapping the on-screen button
1. Activate the camera.
2. If the still camera is not selected, drag 📷 to 📸.
3. To display all settings, press 📊.
4. Tap Capturing method and select On-screen button if it is not already selected.
5. Point the camera towards the subject.
6. Tap the on-screen button 📸. The photo is taken as soon as you release your finger.

To use the zoom function
• When the camera is open, press the volume key up or down to zoom in or out.

To use the still camera flash
1. When the camera is open, press 📊.
2. Tap Flash, and select your desired flash setting.
3. Take the photo.

To view your photos and videos
1. Open the camera, then tap a thumbnail at the bottom of the screen to open a photo or video.
2. Flick left or right to view your photos and videos. Videos are identified by 🎥.

⚠️ In step 1, you can also flick the thumbnails from right to left and then select the one you want to view.

To delete a photo
1. Open the photo you want to delete.
2. Press 📈, and then tap 🗑.

Face detection
You can use face detection to bring an off-centre face into focus. The camera automatically detects up to five faces, indicated by white frames. A yellow frame shows which face has been selected for focus. Focus is set to the face closest to the camera. You can also tap one of the frames to select which face should be in focus.

To turn on face detection
1. Activate the camera.
2. If the still camera is not selected, drag 📷 to 📸.
3. Tap the icon on the top left, then select Normal.
4. To display all settings, press 📊.
5. Tap Focus mode > Face detection.
To take a photo using face detection
1  When the camera is open and Face detection turned on, point the camera at your subject. Up to five faces can be detected, and each detected face is framed.
2  Press the camera key halfway down. A green frame shows which face is in focus.
3  To take the photo, press the camera key fully down.

Smile detection
Smile detection allows you to capture a face just as it smiles. The camera detects up to five faces and selects one face for smile detection and auto focus. A green frame shows which face is selected. When the selected face smiles, the camera automatically takes a photo.

To turn on smile detection
1  Activate the camera.
2  If the still camera is not selected, drag ☰ to ☰.
3  To display all settings, press ☰.  
4  Tap Smile detection and select a smile level.

To take a photo using smile detection
1  When the camera is open and Smile detection is turned on, point the camera at your subject. Each detected face is framed in the viewfinder (not more than five faces).
2  The camera selects which face to focus on.
3  The face selected appears inside a green frame and the photo is taken automatically.
4  If no smile is detected, press the camera key to take the photo manually.

Adding the geographical position to your photos
Turn on geotagging to add the approximate geographical location (a geotag) to photos when you take them. The geographical location is determined either by wireless networks (mobile or Wi-Fi® networks) or GPS technology.

When ☰ appears on the camera screen, geotagging is turned on but the geographical position has not been found. When ☰ appears, geotagging is turned on and the geographical location is available, so your photo can get geotagged. When neither of these two symbols appears, geotagging is turned off.

To turn on geotagging
1  Activate the camera.
2  If the still camera is not selected, drag ☰ to ☰.
3  Press ☰, then tap Geotagging > On.
4  Tap OK to agree to enable GPS and/or wireless networks.
5  Check the options you want to select under My Location.
6  After you confirm your settings, press ☰ to return to the camera screen.
7  If ☰ appears on the camera screen, your location is available and your photo can get geotagged. If not, check your GPS and/or wireless network connection.

Using still camera settings

To adjust the still camera settings
1  Activate the camera.
2  If the still camera is not selected, drag ☰ to ☰.
3  Tap one of the settings icons on the left of the screen.
4  To display all settings, press ☰.  
5  Select the setting you want to adjust, then edit as desired.
To customise the still camera settings panel

1. When the camera is open, press 📷 to display all settings.
2. Touch and hold the setting you want to move and drag it to the desired position.

⚠️ If you drag the setting outside of the settings panel, the change is cancelled.

Still camera settings overview

**Scene recognition**

The camera determines which scene is most suitable. A scene icon and text appears when a scene is selected.

**Normal**

**3D Sweep Panorama**

3D Sweep Panorama™ let you to take wide-angle, panoramic photos of any scene in 3D. Just press the camera key and move the camera steadily from one side to the other.

**Sweep Panorama**

Use this setting to take wide-angle, panoramic photos. Just press the camera key and move the camera steadily from one side to the other.

**Focus mode**

The focus function controls which part of a photo should be sharp. When continuous autofocus is on, the camera keeps adjusting focus so the area within the white focus frame stays sharp.

**Single auto focus**

The camera automatically focuses on the selected subject. Continuous autofocus is on. Touch and hold the camera screen, the white focus frame turns green when the focus is set. The photo is taken when you release you finger.

**Multi auto focus**

The focus is automatically set on several areas of the image. Touch and hold the camera screen, the white focus frame turns green when the focus is set. The photo is taken when you release you finger. Continuous autofocus is off.

**Face detection**

The camera automatically detects up to five human faces, indicated by frames on the camera screen. The camera automatically focuses on the nearest face. You can also select which face to focus on by tapping it on the screen. Touch and hold the camera screen, the white focus frame turns green when the focus is set. The photo is taken when you release you finger. Face detection cannot be used for all scene types. Continuous autofocus is on.

**Infinity**

Use when taking photos from a distance. Focus is set on subjects far away. Subjects close to the camera may be blurred. Continuous autofocus is off.

**Touch focus**

Touch a specific area on the camera screen to set the area of focus. Continuous autofocus is off. Touch and hold the camera screen, the white focus frame turns green when the focus is set. The photo is taken when you release you finger.

⚠️ This setting is only available in **Normal** capturing mode.

**Exposure value**

Determine the amount of light in the photo you want to take. A higher value indicates an increased amount of light.

⚠️ This setting is only available in **Normal** capturing mode.

**Metering**

This function automatically determines a well-balanced exposure by measuring the amount of light striking the image you want to capture.

**Centre**
Adjust the exposure to the centre of the image.

Average
Calculate the exposure based on the amount of light striking the whole image.

Spot
Adjust the exposure in a very small part of image you want to capture.

⚠ This setting is only available in Normal capturing mode.

White balance
The white balance setting adjusts the colour balance according to the lighting conditions.

Auto
Adjust the colour balance automatically to the lighting conditions.

Incandescent
Adjusts the colour balance for warm lighting conditions, such as under light bulbs.

Fluorescent
Adjust the colour balance for fluorescent lighting.

Daylight
Adjust the colour balance for sunny outdoor conditions.

Cloudy
Adjust the colour balance for a cloudy sky.

⚠ This setting is only available in Normal capturing mode.

Image stabiliser
When taking a photo, it can be difficult to hold the phone steady. The stabiliser helps you by compensating for small movements of the hand.

On
The image stabiliser is turned on. Captured images take longer to save when this function is on.

Off
Take a photo with the stabiliser turned off.

⚠ This setting is only available in Normal capturing mode and Front camera capturing mode.

Scenes
Use the Scenes feature to quickly set up the camera for common situations using pre-programmed scenes. The camera determines a number of settings for you to fit the selected scene, ensuring the best possible photo.

Off
The Scenes feature is off and photos can be taken manually.

Portait
Use for portrait photos. Settings are optimised to give slightly softer skin tones.

Landscape
Use for landscape photos. The camera focuses on distant objects. When Landscape is selected, focus mode is changed to Infinity.

Night scene
Use when taking photos at night or in poorly lit environments (without the flash). Due to long exposure time, the camera must be held still or placed on a stable surface. When Night scene is selected, focus mode is changed to Infinity.

Night portrait
Use for portrait photos at night or in poorly lit environments (with or without the flash). Due to long exposure time, the camera must be held still or placed on a stable surface.

Beach and snow
Use in bright environments to avoid underexposed photos.
**Sports**
Use for photos of fast-moving objects. Short exposure time minimises motion blurring.

**Party**
Use for indoor photos in poorly lit environments. This scene picks up indoor background lighting or candlelight. Due to long exposure time, the camera must be held still or placed on a stable surface.

**Document**
Use for photos of text or drawings. Gives the photo increased, sharper contrast.

⚠️ This setting is only available in **Normal** capturing mode.

### Flash

Use the flash to take photos when lighting conditions are poor or when there is a backlight.

- **Auto**
The camera automatically determines if the lighting conditions require the use of a flash.

- **Fill flash**
Use this setting when the background is brighter than the subject. This removes unwanted dark shadows.

- **Off**
The flash is turned off. Sometimes photo quality can be better without the flash, even if lighting conditions are poor. Taking a good photo without using the flash requires a steady hand. Use the self-timer to avoid blurred photos.

- **Red-eye reduction**
Reduces the red colour of eyes when taking a photo.

### Resolution

Choose between several picture sizes and aspect ratios before taking a photo. A photo with a higher resolution requires more memory.

- **5MP 4:3**
5 megapixel picture size with 4:3 aspect ratio. Suitable for photos you want to view on non-widescreen displays or print in high resolution.

- **3MP 16:9**
3 megapixel picture size with 16:9 aspect ratio. A high resolution widescreen format. Has a higher resolution than full HD. Suitable for photos you want to view on widescreen displays.

- **2MP 4:3**
2 megapixel picture size with 4:3 aspect ratio. Suitable for photos you want to view on non-widescreen displays.

- **2MP 16:9**
2 megapixel picture size with 16:9 aspect ratio. Suitable for photos you want to view on widescreen displays.

### Self-timer

With the self-timer you can take a photo without holding the phone. Use this function to take self-portraits, or group photos where everyone can be in the photo. You can also use the self-timer to avoid shaking the camera when taking photos.

- **On (10 s.)**
Set a 10-second delay from when you tap the camera screen until the photo is taken.

- **On (2 s.)**
Set a 2-second delay from when you tap the camera screen until the photo is taken.

- **Off**
The photo is taken as soon as you tap the camera screen.

### Smile detection

Use the smile detection function to determine what kind of smile the camera reacts to before taking a photo.

- **Big smile**
Only take a photo when a big smile is detected.

Average smile
Take a photo when an average smile is detected.

Small smile
Take a photo when only a slight smile is detected.

Off
Smile detection function is off.

Geotagging
Tag photos with details of where you took them

On
When geotagging is turned on, the approximate geographical location is added to photos when you take them. To use geotagging, you must enable location features from the Settings menu. See Using location services to find your position on page 118.

For geotags to be added to a photo, the location must be determined before you take the photo. Your location is determined when appears on the camera screen. When the phone is searching for your position, appears.

Off
When geotagging is turned off, you cannot view the location where you took a photo

Shutter sound
Choose to have or not to have the sound when capturing a photo.

Capturing method
Select the method you use to take photos.

On-screen button
Take a photo by tapping the on-screen button on the camera screen. The photo is taken as soon as you release your finger.

Touch capture
Identify a particular focus area by touching the camera screen with your finger. The photo is taken as soon as you release your finger. This applies only when focus mode is set to touch focus.

Camera key only
Take a photo only using the hardware camera key. The photo is taken as soon as you release your finger.

Tips on using the camera

Rule of thirds
Don’t place your subject in the middle of the frame. By placing it a third of the way in, you achieve a better result.

Hold it steady
Avoid blurry photos by holding the camera steady. Try to steady your hand by leaning it against a solid object.

Get closer
By getting as close as possible to your subject, you can fill the camera screen view with your subject.

Consider variety
Think about different angles, and move towards the subject. Take some vertical photos. Try different positions.

Use a plain background
A plain background helps highlight your subject.
Keep your lens clean
Mobile phones are used in all kinds of weather and places, and carried in pockets and bags. This results in the camera lens becoming dirty and covered with fingerprints. Use a soft cloth to clean the lens.

Using the video camera

To record a video using the camera key
1 Activate the camera.
2 If the video camera is not selected, drag  to .
3 To start recording a video, press the camera key.
4 To stop recording, press the camera key again.

Tips: Shoot your videos in landscape orientation to get the best results.

To record a video by tapping the screen
1 Activate the camera.
2 If the video camera is not selected, drag  to .
3 To display all settings, press  .
4 Tap Capturing method > Touch capture if it is not already selected.
5 Tap the camera screen to start recording.
6 Tap the camera screen to stop recording.

Tips: Shoot your videos in landscape orientation to get the best results.

To record a video by tapping the on-screen button
1 Activate the camera.
2 If the video camera is not selected, drag  to .
3 To display all settings, press  .
4 Tap Capturing method, then select On-screen button if it is not already selected.
5 Point the camera towards the subject.
6 Tap  to start recording.
7 Tap  to stop recording.

Tips: Shoot your videos in landscape orientation to get the best results.

To play recorded videos
1 Activate the camera.
2 If the video camera is not selected, drag  to .
3 Tap the thumbnails on the bottom of the screen.
4 Flick left or right to browse all photo and video files. Videos are identified by .
5 Tap  to play a video.
6 To stop playing the video, tap  or .

Tips: You can also flick the thumbnails from right to left to find the file that you want to play.

To delete a recorded video
1 Browse to the video that you want to delete.
2 Press  , then tap  .
Using video camera settings

To adjust video camera settings
1 Activate the camera.
2 If the video camera is not selected, drag to .
3 Tap one of the settings icons on the left of the screen.
4 To display all settings, press .
5 Select the setting you want to adjust, then make your changes.

To customise the video camera settings panel
1 When the video camera is open, press to display all settings.
2 Touch and hold the setting you want to move and drag it to the desired position.
   🔴 If you drag the setting outside of the settings panel, the change is cancelled.

Video camera settings overview

**Scenes**

The Scenes feature helps you to quickly set up the camera for common situations using pre-programmed scenes. The camera determines a number of settings for you to fit the selected scene, ensuring the best possible video.

- **Off**
  The Scenes feature is off and you can shoot videos manually.

- **Portrait**
  Use for portrait videos. Settings are optimised to give slightly softer skin tones.

- **Landscape**
  Use for videos of landscapes. The camera focuses on distant objects. When Landscape is selected, focus mode is changed to Infinity.

- **Night**
  When turned on, light sensitivity is increased. Use in poorly lit environments. Videos of fast-moving objects may get blurred. Hold your hand steady, or use a support. Turn off night mode when lighting conditions are good, to improve the video quality.

- **Beach and snow**
  Use in bright environments to avoid underexposed videos.

- **Sports**
  Use for videos of fast-moving objects. Short exposure time minimises motion blurring.

- **Party**
  Use for indoor videos in poorly lit environments. This scene picks up indoor background lighting or candlelight. Videos of fast-moving objects may get blurred. Hold your hand steady, or use a support.

**Photo light**

Use the light to record videos when lighting conditions are poor or when there is a backlight.

- **On**

- **Off**
  Sometimes the video quality can be better without a light, even if lighting conditions are poor.

**Capturing method**

Select the method you use to record a video.

- **On-screen button**
  Record a video by using the on-screen button on the camera screen.

- **Touch capture**
  Identify a particular focus area by touching the camera screen with your finger.
Camera key only
Record a video by using only the hardware camera key.

Focus mode
The focus setting controls which part of a video should be sharp. When continuous autofocus is on, the camera keeps adjusting focus so that the area within the white focus frame stays sharp.

Single auto focus
The camera automatically focuses on the selected subject. Continuous autofocus is on.

Face detection
The camera automatically detects up to five human faces, indicated by frames on the screen. The camera automatically focuses on the nearest face. You can also select which face to focus on by tapping it on the screen. When you tap the camera screen, a green frame shows which face is selected and in focus. Face detection cannot be used for all scene types. Continuous autofocus is on.

Infinity
Use when recording videos from a distance. Focus is set on subjects far away. Subjects close to the camera may be blurred.

Video size
Adjust the video size for different formats

- HD 720p
  HD (High Definition) format with 16:9 aspect ratio. 1280×720 pixels.
- Full Wide VGA
  Full Wide VGA format with 16:9 aspect ratio. 864×480 pixels.
- VGA
  VGA format with 4:3 aspect ratio. 640x480 pixels.
- QVGA
  Quarter VGA format with 4:3 aspect ratio. 320x240 pixels.

Multimedia message
Record videos suitable for sending in multimedia messages. The recording time of this video format is limited to fit in a multimedia message.

Self-timer
With the self-timer you can record a video without holding the phone. Use it to record group videos where everyone can be in the video. You can also use the self-timer to avoid shaking the camera when recording videos.

- On (10 s.)
  Set a 10-second delay from when you tap the camera screen until the video begins to record.
- On (2 s.)
  Set a 2-second delay from when you tap the camera screen until the video begins to record.
- Off
  The video begins to record as soon as you tap the camera screen.

Exposure value
This setting allows you to determine the amount of light in the image you capture. A higher value indicates an increased amount of light.

White balance
The white balance setting adjusts the colour balance according to the lighting conditions.

- Auto
  Adjust the colour balance automatically to the lighting conditions.
- Incandescent
  Adjusts the colour balance for warm lighting conditions, such as under light bulbs.
- Fluorescent
  Adjust the colour balance for fluorescent lighting.
### Daylight
Adjust the colour balance for sunny outdoor conditions.

### Cloudy
Adjust the colour balance for a cloudy sky.

3D camera

The 3D camera helps you take wide-angle, panoramic photos that capture more of the scene and add depth to the subject. 3D Sweep Panorama™ photos can be played back on a TV that supports 3D.

To activate the 3D Camera
• From your Home screen, tap 📱, then find and tap 📷.

3D Camera overview

- 1 Switch between still and video camera
- 2 Take photos or record video clips
- 3 Directional arrow – helps you pan the camera
- 4 View photos and videos
- 5 Settings bar

To take a photo in 3D Sweep Panorama™ mode
1 Activate the 3D camera.
2 Tap the icon on the top left of the screen, then select 3D Sweep Panorama if it is not already selected.
3 Press the camera key halfway down to lock the focus.
4 Press the camera key fully down, then pan the camera from left to right in a steady horizontal movement.

Tips for taking 3D Sweep Panorama™ photos
Note these limitations when taking 3D photos:
• 3D shooting is not suitable when the subject is large or not stationary; when the main subject is too close to the camera; and when the subject offers little contrast, such as the sky, a sandy beach, or a lawn.
• 3D images consist of several JPEG images and associated MPO files. If you delete an MPO file on the camera (while it is connected to a computer), you will no longer be able to view the associated JPEG image.
• If you cannot pan the camera across the entire subject within the given shooting time, a grey area occurs in the composite image. If this happens, move the camera faster to record a full 3D image.
• Under low light conditions, images may be blurred. To get the best results, shoot images in bright outside light.
• Under lights that flicker, such as fluorescent lights, 3D shots may not be successful.
• When you press the camera key halfway down, you set the Auto Focus lock and the Auto Exposure lock. If the brightness, focus and other conditions change considerably between the time you set these two locks and the time you press the camera key fully down to take the shot, the shot might not be successful.
• The camera may cancel 3D shooting in the following situations: you pan the camera too quickly; you shake the camera too much; you pan the camera in the reverse direction.
To take a photo in Sweep Panorama™ mode

1. Activate the 3D camera.
2. Tap the icon on the top left of the screen, then select Sweep Panorama.
3. Tap the icon and select the direction in which to pan.
4. Press the camera key halfway to lock the focus and exposure.
5. Press the camera key fully down, then pan the camera steadily in the direction of the moving arrow.

Tips for taking Sweep Panorama™ photos (2D)

Note these limitations when you take Sweep Panorama™ photos:

- If you cannot pan the phone across the entire subject within the given time, a grey area occurs in the composite image. If this happens, move the camera faster to record a full panorama image.
- Since several images are stitched together, the stitched part does not always record smoothly.
- Under low light conditions, panorama images can be blurred or of low quality.
- Under lights that flicker, such as fluorescent lights, the brightness or colour of the combined images may not be consistent.
- Sweep Panorama™ mode is not suitable for the following situations: when subjects are moving or are too close to the camera; when target images offer little contrast, such as photos of skies, sand beaches, or lawns; and when images change constantly, such as waves or waterfalls.
- The camera can cancel shooting in the following situations: you pan the camera too quickly; you shake the camera too much; you pan the camera in the reverse direction.
Viewing photos and videos in Gallery

Use Gallery to view photos and play videos that you’ve taken with your phone camera, or to view similar content that you’ve downloaded or copied to the memory card. In Gallery, you can also view photos and videos that you’ve uploaded to an online service, for example, to a Picasa™ web album or to From Gallery, you can also share your favorite photos and videos with friends by using Bluetooth™ wireless technology, email or messaging. And you can perform basic editing tasks on photos and set them as wallpaper or contact pictures. For more information, see Connecting your phone to a computer on page 116.

BRAVIA® ENGINE

Sony’s Mobile BRAVIA® ENGINE technology improves the viewing quality of photos and videos after you take them, giving you clearer, sharper and more natural images. BRAVIA® ENGINE is turned on by default, but you can turn it off if you want to reduce battery consumption.

To turn off Mobile BRAVIA® ENGINE
1. From your Home screen, tap 📷.
2. Find and tap Settings > Display.
3. Unmark the Mobile BRAVIA Engine checkbox if it is already marked.

To open Gallery and view your albums
1. From your Home screen, tap 📷.
2. Find and tap Xperia™ Gallery. Photos and videos on your memory card, including those you’ve taken with the camera and those you’ve downloaded from the web or other locations, appear in albums.

💡 If the screen orientation does not change automatically when you turn the phone sideways, mark the Auto-rotate screen checkbox under Settings > Display.

1. Tap to open the camera
2. Tap to open 3D Album
3. Album stack – touch with two fingers and spread them apart to view the content
4. Album of photos and videos taken with the phone camera
5. Flick left or right on the screen to view more albums

Working with albums

You can rearrange your photos and videos within albums as well as move content between albums. You can also upload content from your Gallery albums to online services such as Picasa™ and Facebook™, and you can view content from such online services in Gallery.
To open an album in Gallery
1. From your Home screen, tap 📷.
2. Find and tap Xperia™ Gallery.
3. Tap the album you want to view. The album opens displaying its photo and video content in a chronologically ordered grid. The name of the album appears at the top of the screen.

To view photos and videos in Gallery
1. From your Home screen, tap 📷.
2. Find and tap Xperia™ Gallery.
3. Tap an album. Photos and videos are displayed in a chronologically ordered grid. Videos are indicated by 🎥.
4. Tap a photo or video to view it.
5. Flick left to view the next photo or video. Flick right to view the previous photo or video.

- If the screen orientation does not change automatically when you turn the phone sideways, mark the Auto-rotate screen checkbox under Settings > Display.

To change how the contents of an album are displayed in Gallery
1. When viewing an album in Gallery, drag the album view switch 📷 to the right to view the contents of the album in stacks.
2. Drag the album view switch 📷 to the left to view the album contents in a chronological grid.

Working with batches of content in Gallery
You can select several photos or videos in an album and work on them in batches, for example, to send a few photos from an album to a friend.

To work with batches of photos or videos in Gallery
1. From your Home screen, tap 📷.
2. Find and tap Xperia™ Gallery.
3. Open the album containing the content that you want to work with.
4. To activate selection mode, touch and hold one of the items that you want to work with.
5. Check or uncheck the items that you want to work with.
6. Press 📷, then use the tools in the toolbar to to work with your selected items.
To share an album in Gallery

! If you share an album, do not delete the original copy of the album before the items in the album are completely sent.

1 From the main Gallery screen, touch and hold an album that you want to work with. Selection mode is now activated.
2 Check the albums you want to share, then press Share.
3 Tap Share.
4 In the menu that opens, tap the application that you want to use to share the selected albums.

To delete an album in Gallery

1 From the main Gallery screen, touch and hold an album that you want to work with. Selection mode is now activated.
2 Check the albums that you want to delete, then press Delete.
3 Tap Delete. In the dialog that opens, tap Delete again.

Working with photos in Gallery

You can edit and reorganise your photos in Gallery. For example, you can crop photos, use them as contact pictures and as wallpaper.

To zoom a photo
• When you are viewing a photo, double-tap the screen to zoom in. Double-tap again to zoom out.
• When you are viewing a photo, spread two fingers apart to zoom in, or pinch two fingers together to zoom out.

To watch a slideshow of your photos
1 From your Home screen, tap Photos.
2 Find and tap Xperia™ Gallery.
3 Tap an album to open it, then tap a photo and press Share.
4 In the toolbar at the bottom of the screen, tap Slideshow.
5 Tap a photo to end the slideshow.

To rotate a photo
1 When you are viewing a photo, press More.
2 Tap More, then select Rotate Left or Rotate Right. The photo is saved in the new orientation.

To use a photo as a contact picture
1 When you are viewing a photo in the photo viewer, press More.
2 In the toolbar at the bottom of the screen, tap Set as > Contact picture.
3 Select the contact you want to associate with the photo.
4 Crop the photo, if required.
5 Tap Save.

To use a photo as wallpaper
1 When you are viewing a photo in the photo viewer, press More.
2 In the toolbar at the bottom of the screen, tap Set as > Wallpaper.
3 Crop the photo, if required.
4 Tap Save.
To crop a photo
1 When you are viewing a photo in the photo viewer, press 
2 In the toolbar, tap More > Crop.
3 To adjust the crop frame, touch and hold the edge of the crop frame. When crop arrows appear, drag inward or outward to resize the frame.
4 To resize all sides of the crop frame at the same time, touch and hold one of the four corners to make the arrows appear, then drag the corner accordingly.
5 To move the crop frame to another area of the photo, touch and hold inside the frame, then drag it to the desired position.
6 To save a copy of the photo as you cropped it, tap Save. The original uncropped version remains on your phone’s memory card.

To share a photo
1 When you are viewing a photo in the photo viewer, press 
2 In the toolbar, tap Share.
3 Select one of the available transfer methods.

To delete a photo
1 When you are viewing a photo in the photo viewer, press 
2 In the toolbar at the bottom of the screen, tap Delete.
3 In the dialog that opens, tap Delete.

Viewing your photos on a map
If you enable location detection when taking photos, you can use the information gathered at a later stage. For example, you can view your photos on a map and show friends and family where you were when you took the photo. Adding location information is also referred to as geotagging. When you enable location detection, you can select to use either GPS satellites or wireless networks, or both, to find your position.

For more information, see Using location services to find your position on page 118

To enable location detection
1 From your Home screen, press 
2 Tap Settings > Location services.
3 Mark the GPS satellites and/or Google's location service checkboxes.

To view geotagged photos on a map
1 When you are viewing a photo that you have geotagged, press 
2 Tap More > Show on map.

Working with videos
Use Gallery to watch videos that you’ve taken with the camera, downloaded, or copied to your memory card. You can also share your videos with friends, or upload them to YouTube™.

To play a video
1 In Gallery, browse to the album containing the video that you want to play.
2 Tap the video to play it.
3 If the playback controls are not displayed, tap the screen to display them. To hide the controls, tap the screen again.

To pause a video
1 When a video is playing, tap the screen to display the controls.
2 Tap 

This is an Internet version of this publication. © Print only for private use.
To fast forward and rewind a video
1 When a video is playing, tap the screen to display the controls.
2 Drag the progress bar marker left to rewind, or right to fast forward.

💡 Alternatively, you can tap ⏯️ or ⏯️.

To adjust the volume of a video
• Press the volume key.

To share a video
1 Open a Gallery album containing a video.
2 To activate selection mode, touch and hold an item that you want to work with.
3 Check the video or videos that you want to share.
4 Press ⏯️.
5 Tap Share.
6 In the menu that opens, tap the application that you want to use to share the selected video, then follow the relevant steps to send it.

⚠️ You might not be able to copy, send or transfer copyright-protected items. Also, some items may not send if the file size is too large.

To delete a video
1 Open a Gallery album containing a video.
2 To activate selection mode, touch and hold an item that you want to work with.
3 Check the video or videos that you want to delete.
4 Press ⏯️, then tap Delete.
5 In the dialog that opens, tap Delete.
Viewing photos in 3D Album

In 3D Album you can view and play all photos taken with your 3D camera.

To view your 3D photos in 3D Album
1. From your Home screen, tap 🎥.
2. Find and tap 3D Album.
3. Tap a 3D photo.
4. Flick left to view the next 3D photo in 3D Album. Flick right to view the previous 3D photo.

To play a 3D photo in 3D Album
1. Open the 3D photo. If no controls are displayed, tap the screen.
2. Tap 🎥.

⚠️ You can only play 3D photos that have been captured in the standard panorama image size.

To zoom a 3D photo in 3D Album
- When you view a 3D photo in 3D Album, double-tap the photo to zoom in or out.

👉 To zoom in or out, you can also pinch two fingers together or spread them apart. Then drag the 3D photo to view different parts of it.

Managing your photos in 3D Album

Use 3D Album to upload your 3D photos to online web albums. For example, if you’re a Facebook™ user, you can upload your photos in 3D Album to your Facebook™ account. You can also use 3D Album to delete photos.

To share a 3D photo in 3D Album
1. When you view a 3D photo in 3D Album, tap the 3D photo if no controls are displayed.
2. Tap 🎥.
3. Select one of the available transfer methods.

To delete a 3D photo in 3D Album
1. When you view a 3D photo in 3D Album, tap the photo if no controls are displayed.
2. Tap 🗑️, then tap OK.
Bluetooth™ wireless technology

Use the Bluetooth™ function to send files to other Bluetooth™ compatible devices, or to connect to handsfree accessories. Turn on the Bluetooth™ function in your phone and create wireless connections to other Bluetooth™ compatible devices such as computers, handsfree accessories, and phones. Bluetooth™ connections work better within a 10 meter (33 foot) range, with no solid objects in between. In some cases you have to manually pair your phone with other Bluetooth™ devices. Remember to set your phone to “discoverable” if you want other Bluetooth™ devices to detect it.

![Interoperability and compatibility among Bluetooth™ devices can vary.]

To turn on the Bluetooth™ function and make your phone visible
1. From your Home screen, tap .
2. Find and tap Settings.
3. Tap ○ beside Bluetooth so that ○ changes to |. 📤 appears in the status bar.
4. Tap Bluetooth.
5. Tap Not visible to other Bluetooth devices.

To adjust your phone’s visibility time to other Bluetooth™ devices
1. From your Home screen, tap .
2. Find and tap Settings > Bluetooth.
3. Press ☀ and select Visibility timeout.
4. Select an option.

Naming your phone

You can give your phone a name. This name is shown to other devices after you have turned on the Bluetooth™ function and your phone is set to visible.

To give your phone a name
1. Make sure that the Bluetooth™ function is turned on.
2. From your Home screen, tap .
3. Find and tap Settings > Bluetooth.
4. Press ☀ and select Rename phone.
5. Enter a name for your phone.
6. Tap Rename.

Pairing with another Bluetooth™ device

When you pair your phone with another device, you can, for example, connect your phone to a Bluetooth™ handsfree or a Bluetooth™ car kit and use these devices to make and receive calls.

Once you have paired your phone with a Bluetooth™ device the phone will remember this pairing. When pairing the phone with a Bluetooth™ device, you may need to enter a passcode. Your phone will automatically try the generic passcode 0000. If this does not work, refer to your Bluetooth™ device documentation for the device passcode. You do not need to re-enter the passcode the next time you connect to a paired Bluetooth™ device.

Some Bluetooth™ devices, for example, most Bluetooth™ headsets, require you to both pair and connect with the other device.

You can pair your phone with several Bluetooth™ devices, but you can only connect to one Bluetooth™ profile at the same time.
To pair your phone with another Bluetooth™ device
1 Make sure that the device you want to pair your phone with has the Bluetooth™ function activated and is visible to other Bluetooth™ devices.
2 From the Home screen, tap 📲.
3 Find and tap Settings > Bluetooth. All available Bluetooth™ devices appear in a list.
4 Tap the Bluetooth™ device that you want to pair with your phone.
5 Enter a passcode, if required. The phone and the Bluetooth™ device are now paired.

To connect your phone to another Bluetooth™ device
1 If you are connecting to a Bluetooth device that requires you to first pair your phone before connecting, follow the relevant steps to pair your phone with that device.
2 From your Home screen, tap 📲.
3 Find and tap Settings > Bluetooth.
4 Tap the Bluetooth™ device to which you want to connect your phone.

To unpair a Bluetooth™ device
1 From the Home screen, tap 📲.
2 Find and tap Settings > Bluetooth.
3 Under Paired devices, tap 📲 beside the name of the device that you want to unpair.
4 Tap Unpair.

Sending and receiving items using Bluetooth™ technology
Share items with other Bluetooth™ compatible devices such as phones or computers. You can send and receive several kinds of items using the Bluetooth™ function, such as:
- Photos and videos
- Music and other audio files
- Contacts
- Web pages

To send items using Bluetooth™
1 Receiving device: Make sure the Bluetooth™ device that you want to send the item to has Bluetooth™ turned on and is visible to other Bluetooth™ devices.
2 In the sending device, open the application which contains the item you want to send and scroll to the item.
3 Depending on the application and the item you want to send, you may need to, for example, touch and hold the item, open the item or press 📲. Other ways to send an item may exist.
4 Select a share or send menu item.
5 In the menu that appears, select Bluetooth.
6 Turn on Bluetooth™, if you are asked to do so.
7 Tap the name of the receiving device.
8 Receiving device: If asked, accept the connection.
9 If asked, enter the same passcode on both devices, or confirm the suggested passcode.
10 Receiving device: Accept the incoming item.
To receive items using Bluetooth™

1. Make sure there is a memory card in your phone. If you don’t have a memory card inserted, you cannot send or receive items using Bluetooth wireless technology.
2. From your Home screen, tap 📲.
3. Make sure that the Bluetooth™ function is on and is visible to other Bluetooth™ devices.
4. The sending device now starts sending data to your phone.
5. If prompted, enter the same passcode on both devices, or confirm the suggested passcode.
6. When you are notified of an incoming file to your phone, drag the status bar downwards and tap the notification to accept the file transfer.
7. Tap Accept to start the file transfer.
8. To view the progress of the transfer, drag the status bar downwards.
9. To open a received item, drag the status bar downwards and tap the relevant notification.

To view files you have received using Bluetooth™

1. From your Home screen, tap 📲.
2. Find and tap Settings > Bluetooth.
3. Press ☐ and select Show received files.
Connecting your phone to a computer

Connect your phone to a computer and start transferring pictures, music and other file types. The easiest ways to connect are using a USB cable or Bluetooth wireless technology.

When you connect your phone to the computer using a USB cable, you are prompted to install the PC Companion application on your computer. PC Companion helps you access additional computer applications to transfer and organise media files, update your phone, synchronise phone content, and more.

⚠️ You might not be able to transfer some copyright-protected material between your phone and computer.

Transferring and handling content using a USB cable

Use a USB cable connection between a computer and your phone for easy transfer and management of your files. Once the two devices are connected, you can drag and drop content between them using the computer’s file explorer. If you’re transferring music, video, pictures or other media files to your phone, it’s best to use the Media Go™ application on your computer. Media Go™ converts media files so that you can use them on your phone.

To transfer content between a phone and computer using a USB cable
1 Using a USB cable, connect your phone to a computer. SD card connected appears in the status bar.
2 Computer: Open Microsoft® Windows® Explorer from the desktop and wait until your phone’s SD card appears as an external disk in Microsoft® Windows® Explorer.
3 Computer: Drag and drop the desired files between your phone and the computer.

USB connection modes

There are two common methods that you can use to share data between your phone and other devices:

• Media Transfer Protocol (MTP) – the most common protocol for communication with Windows computers. MTP mode is enabled by default.
• Mass Storage Class (MSC) mode – the most common way to connect phones with media devices such as TVs, car kits, and Mac OS/Linux computers lacking MTP support.

To set MSC mode as the default USB connection mode
1 Make sure that your phone is not connected to a USB cable.
2 From your Home screen, tap ⓐ
3 Find and tap Settings > Xperia™ > Connectivity > USB connection mode.
4 Tap Mass storage mode (MSC).
5 Tap OK.

To connect your phone to a computer when MSC mode is active
• Using the USB cable, connect your phone to the computer. An MSC mode connection is established automatically.

To reestablish an MSC mode connection when the USB cable is still connected
1 Drag down the status bar.
2 Tap SD card disconnected.

To safely disconnect the USB cable after an MSC mode transfer
⚠️ Do not disconnect the USB cable when transferring content as this may corrupt the content.
1 Computer: Use the Safely Remove Hardware feature to disable the USB cable connection.
2 Phone: Drag the status bar downwards, then tap SD card connected.
3 Disconnect the USB cable from both devices.

⚠️ Computer instructions may vary depending on your operating system. Refer to the documentation for your computer’s operating system for more information.

PC Companion

PC Companion is a computer application that gives you access to additional features and services which help you transfer music, video and pictures to and from your phone. You can also use PC Companion to update your phone and get the latest software version available. The installation files for PC Companion are saved on your phone and the installation is launched from the phone when you connect it to a computer via USB cable.

You need a computer running one of the following operating systems to use the PC Companion application:

- Microsoft® Windows® 7
- Microsoft® Windows Vista®
- Microsoft® Windows® XP (Service Pack 3 or higher)

To install PC Companion

1 New phone: Turn on your new Android™ phone and connect it to a PC using a USB cable.
2 New phone: Tap Install to install PC Companion on the PC.
3 Computer: If a popup window appears, select Run Startme.exe. In the new popup window that appears, click Install to start the installation and then follow the instructions to complete the installation.

To start PC Companion

1 Make sure that PC Companion is installed on your PC.
2 Open the PC Companion application on the PC, then click Start to open one of the features that you want to use.

Media Go™

The Media Go™ computer application helps you transfer and manage media content in your phone and computer. You can install and access Media Go™ from within the PC Companion application. See PC Companion on page 117 for more information.

You need one of these operating systems to use the Media Go™ application:

- Microsoft® Windows® 7
- Microsoft® Windows Vista®
- Microsoft® Windows® XP, Service Pack 3 or higher

To transfer content using the Media Go™ application

1 Connect your phone to a computer using a supported USB cable.
2 Phone: In the status bar, SD card connected appears.
3 Computer: The PC Companion application launches automatically. In PC Companion, click Media Go to start the Media Go™ application. In some cases, you may have to wait for Media Go™ to install.
4 Using Media Go™, drag and drop files between your computer and phone.

Media Go™ can also be downloaded from www.sonymobile.com.
Using location services to find your position

Use your phone to find out where you are. There are two methods: GPS and wireless networks. Enable the wireless networks option if you only need your approximate location, and want it fast. If you want a more exact position, and have a clear view of the sky, enable the GPS option. In situations where the wireless network connection is weak, you should enable both options to ensure that your location is found.

⚠ Sony Ericsson does not warrant the accuracy of any location services including but not limited to navigational services.

To enable GPS
1. From your Home screen, tap 🗺️.
2. Tap Settings > Location services.
3. Mark the GPS satellites checkbox.

Using GPS
Your phone has a global positioning system (GPS) receiver that uses satellite signals to calculate your location.

⚠ When you use features that require the GPS receiver to find your location, make sure you have a clear view of the sky.

Getting the best performance
The first time you use the GPS it can take 5 to 10 minutes for your location to be found. To help the search, make sure you have a clear view of the sky. Stand still and don’t cover the GPS antenna (the highlighted area in the image). The GPS signals can pass through clouds and plastic, but not through most solid objects such as buildings and mountains. If your location isn’t found after a few minutes, move to another location.

Google Maps™
Track your current location, view real-time traffic situations and receive detailed directions to your destination. Before taking trips, you can download and save maps to your memory card to avoid high roaming costs.

⚠ The Google Maps™ application requires the use of an Internet connection. You may incur data connection charges when you connect to the Internet from your phone. Contact your network provider.
To use Google Maps™
1 From your Home screen, tap 📴.
2 Find and tap Maps.

If you want to use Google Maps™, you have to enable one of the location methods available under Settings > Location services.

To learn more about Google Maps™
• When you use Google Maps™, press 📴, then tap Help.

Viewing your friends’ locations with Google Latitude™
Join Google Latitude™ to view your friends’ locations on maps and share your location and other information with them.

Using Google Maps™ to get directions
Use the Google Maps™ application to get directions when you travel by foot, public transportation, or car. You can add a shortcut to a destination on your Home screen to get quick directions from wherever you are.

When you view a map, you make an Internet connection, and data is transferred to your phone. So it’s a good idea to download and save maps to your phone before you take a trip. This way, you can avoid high roaming costs.

Sony Ericsson does not warrant the accuracy of any directional services.

Using the Navigation application
Use the Navigation application in your phone to get turn-by-turn instructions on how to get places. The directions are both spoken and displayed on the screen.

The Navigation application may not be available in every market.

To start Navigation
1 From your Home screen, tap 📴.
2 Find and tap Navigation.

Using the Wisepilot™ application
Get turn-by-turn voice instructions on how to get places. You can also manage your trips and share routes and locations with friends via SMS, Twitter™ or Facebook™.

Wisepilot™ may not be available in every market. For more information, including a Wisepilot User manual, go to www.sonymobile.com.

To start Wisepilot™
1 From the Home screen, tap 📴.
2 Find and tap Wisepilot.
Backing up and restoring

Use the Backup and restore application to make backups of phone content to your memory card or online storage account. Such backups can be used to restore your content and some phone settings in cases where your data gets lost or deleted.

Types of content you can back up

Use the Backup and restore application to back up the following types of data:

- Bookmarks
- Call log
- Contacts
- (Android) Market™ applications
- Multimedia messages
- System settings (such as alarms, ringer volume)
- Text messages

⚠️ Music files, and photos or videos taken with the phone camera are automatically saved on the memory card and do not need to be backed up.

⚠️ You may incur additional data transmission charges when you restore Android Market™ applications.
Locking and protecting your phone

IMEI number

Every phone has a unique IMEI (International Mobile Equipment Identity) number. You should keep a copy of this number. If your phone is stolen, your network provider can use your IMEI number to stop the phone from accessing the network in your country.

To view your IMEI number

1. Turn off your phone, then remove the battery cover and battery.
2. Look for the 15- to 17-digit number on the label. The first 15 digits represent the IMEI number.

To view your IMEI number in the phone

1. From your Home screen, tap 📱.
2. Find and tap Settings > About phone > Status.
3. Scroll to IMEI to view the IMEI number.

SIM card protection

The SIM card lock only protects your subscription. Your phone will still work with a new SIM card. If the SIM card lock is on, you have to enter a PIN (Personal Identity Number). If you enter your PIN incorrectly more times than the maximum number of attempts allowed, your SIM card will become blocked. You need to enter your PUK (Personal Unblocking Key) and then a new PIN. Your PIN, PIN2 and PUK are supplied by your network operator.

To enable the SIM card PIN lock

1. From the Home screen, tap 📱.
2. Find and tap Settings > Security > Set up SIM card lock > Lock SIM card.
3. Enter the SIM card PIN and tap OK.

To change the SIM card PIN

1. From the Home screen, tap 📱.
2. Find and tap Settings > Security > Set up SIM card lock > Change SIM PIN.
3. Enter the old SIM card PIN and tap OK.
4. Enter the new SIM card PIN and tap OK.
5. Re-type the new SIM card PIN and tap OK.

To change the SIM card PIN2

1. From the Home screen, tap 📱.
2. Find and tap Settings > Call settings > Fixed dialling numbers > Change PIN2.
3. Enter the old SIM card PIN2 and tap OK.
4. Enter the new SIM card PIN2 and tap OK.
5. Confirm the new PIN2 and tap OK.
To unblock a locked SIM card
1. When SIM card locked appears, enter the PUK code.
2. Enter a new PIN code and tap OK.

! If you enter an incorrect PUK code too many times, the SIM card becomes blocked. If this happens, contact your service provider to get a new SIM card.

Setting a screen lock

To set a screen lock
1. From your Home screen, tap > Settings > Security > Screen lock.
2. Select an option.

! It is very important that you remember your screen unlock pattern, PIN or password. If you forget this information, it may not be possible to restore important data such as contacts and messages. Refer to Sony Ericsson Customer support for more information.

To create a screen unlock pattern
1. From the Home screen, tap .
2. Find and tap Settings > Security > Screen lock > Pattern.
3. Follow the instructions in your phone. You are asked to select a security question that will be used to unlock the phone if you forget your screen unlock pattern.

To unlock the screen using a screen unlock pattern
1. Activate the screen.
2. Draw your screen unlock pattern.

! If the unlock pattern you draw on the screen is rejected five times in a row, you can select to either wait 30 seconds and then try again, or to answer the security question you have selected.

To change the screen unlock pattern
1. From your Home screen, tap .
2. Find and tap Settings > Security > Screen lock.
3. Draw your screen unlock pattern.
4. Tap Pattern.
5. Follow the instructions in your phone.

To disable the screen unlock pattern
1. From your Home screen, tap > Settings > Security > Screen lock.
2. Draw the screen unlock pattern.
3. Tap Slide.

To create a screen unlock PIN
1. From your Home screen, tap > Settings > Security > Screen lock > PIN.
2. Enter a numeric PIN.
3. If necessary, tap to minimise the keyboard.
4. Tap Continue.
5. Re-enter and confirm your PIN.
6. If necessary, tap to minimise the keyboard.
7. Tap OK.

To disable the screen unlock PIN
1. From your Home screen, tap > Settings > Security > Screen lock.
2. Enter your PIN, then tap Next.
3. Tap Slide.
To create a screen lock password
1 From your Home screen, tap 🏛️ > Settings > Security > Screen lock > Password.
2 Enter a password.
3 If necessary, tap 📱 to minimise the keyboard.
4 Tap Continue.
5 Re-enter and confirm your password.
6 If necessary, tap 📱 to minimise the keyboard.
7 Tap OK.

To disable the screen unlock password
1 From your Home screen, tap 🏛️ > Settings > Security > Screen lock.
2 Enter your password and tap Next.
3 Tap Slide.
Updating your phone

Update your phone to the most recent software version to get optimal performance and the latest enhancements.

You can use the Update center application on your phone to run a wireless update or you can use the PC Companion application on a computer to run an update using a USB cable connection. If you update wirelessly, then you can use either a mobile network or a Wi-Fi® network connection. Just make sure you back up and save all data stored on your phone before you update.

⚠️ When you run an update using the Update center application, a data connection is established and related charges may be incurred. Also, the availability of updates over a mobile network depends on your operator. Contact your network operator for more information.

Updating your phone wirelessly

Use the Update center application to update your phone wirelessly. You can download software updates manually, or you can allow Update service to update your phone automatically whenever downloads become available. When the automatic update feature is activated, a notification appears in the status bar every time an update becomes available.

To download software updates manually from Update center

1. From your Home screen, tap 📲.
2. Find and tap Update center.
3. Select the desired application or system update and tap Download, or tap Update all to download all application updates.

⚠️ Application updates launch automatically after download. With system updates, wait for your phone to restart, then install the update manually. Also, You may incur data connection charges when downloading updates over 3G/mobile networks.

To activate automatic software updates from Update center

1. From your Home screen, tap 📲.
2. Find and tap Update center.
3. Press ⎪, then tap Settings.
4. Tap Allow automatic update: and select whether to download updates via 3G and Wi-Fi® networks, or via Wi-Fi® networks only. Updates are now downloaded automatically as soon as they become available.

⚠️ You may incur data connection charges when downloading updates over 3G/mobile networks.

To install system updates

1. From your Home screen, tap 📲.
2. Find and tap Update center.
3. Select a system update you want to install, then tap Install.

Updating your phone using a USB cable connection

Some updates are not available for wireless download. Notifications appear in the status bar to inform you of such updates. To download and run the updates, you need a USB cable and a computer running the PC Companion application. You can install PC Companion on the computer using installation files saved on your phone, or you can download the application directly from www.sonymobile.com.
To download the PC Companion application from your phone
1 Connect your phone to a computer using a USB cable.
2 When prompted, follow the instructions in the phone to launch the installation of PC Companion on the computer.

PC Companion can also be downloaded from www.sonymobile.com.

To download software updates using a USB cable connection
1 Install the PC Companion application on the computer you are using, if it is not already installed.
2 Connect your phone to the computer using a USB cable.
3 Computer: Launch the PC Companion application. After a few moments, PC Companion detects your phone and searches for new phone software.
4 Phone: When notifications appear in the status bar, follow the on-screen instructions to carry out the relevant software updates.

To update your phone using an Apple® Mac® computer
1 Install the Bridge for Mac application on the Apple® Mac® computer you are using, if it is not already installed.
2 Using a USB cable, connect your phone to the Apple® Mac® computer.
3 Computer: Launch the Bridge for Mac application. After a few moments, Bridge for Mac detects your phone and searches for new phone software.
4 Computer: If a new phone software update is detected, a popup window appears. Follow the on-screen instructions to carry out the relevant software updates.

⚠ The Bridge for Mac application is downloadable from www.sonymobile.com.

⚠️ Some applications are not supported by all networks and/or service providers in all areas.
User support

Access user support directly in your phone through the Support application. For example, you can open a User guide with instructions on how to use your phone. You can also get troubleshooting and other help from the Sony Ericsson support zone, and from our Customer support service.

- Support application features:
  - Tools – enhance battery and software performance, and improve connectivity.
  - User guide in the phone – read and search an extended User guide.
  - Educate yourself – read tips and tricks, get the latest news, and watch how-to videos.
  - Email support – send an email to our support team.
  - Support zone – visit www.sonymobile.com for comprehensive support to get the most for your phone.
  - Troubleshooting – find common problems and error messages at the end of our User guides and on the support zone.
  - Customer support – if all else fails. The relevant support numbers are listed in the supplied Important information leaflet.

! An extended User guide is also available at www.sonymobile.com.

To access the support application

1. From your Application screen, find and tap .
2. Find and tap the required support item.
Troubleshooting

My phone is not working as expected
If you experience problems with your phone, check these tips before you try anything else:

- Restart your phone.
- Remove and re-insert the battery and SIM card. Then restart your phone.
- Update your phone. Updating your phone ensures optimal performance and provides the latest enhancements. See Updating your phone on page 124 for more information.
- Reset your phone.

⚠️ Be patient while resetting your phone. Restarting the phone during a reset procedure may damage the phone permanently.

To force restart
- Press and hold 🏠 and ⏿ for five seconds and the phone will automatically restart.

To force a phone shutdown
1. Press and hold both the volume up key and the power ⏿ key for 10 seconds.
2. After your phone vibrates three times, release the keys. The phone turns off automatically.

Resetting the phone
You can reset your phone to its original settings, with or without deleting all of your personal data. It is possible to reset the phone to the state it was in before you first turned it on. But before you perform a reset, make sure to back up any important data saved on your phone.

To reset the phone
⚠️ To avoid permanent phone damage, do not restart the phone while a reset procedure is underway.

1. From your Home screen, tap 🕒.
2. Find and tap Settings > Backup & reset.
3. Tap Factory data reset.
4. To erase not only internal storage but also other user data such as pictures and music, mark the Erase SD card checkbox.
5. Tap Reset phone.
6. To confirm, tap Erase everything.

I cannot charge the phone
The charger is not properly connected or the battery connection is poor. Remove the battery and clean the connectors.

No battery charging icon appears when phone starts charging
It may take a few minutes before the battery icon appears on the screen.
The battery performance is low
Follow our smart tips on how to get more out of your battery. See *Improving battery performance* on page 16.

I cannot transfer content between my phone and the computer, when using a USB cable
The software or the USB drivers have not been properly installed. Go to www.sonymobile.com for more detailed installation instructions and troubleshooting sections.

I cannot use Internet-based services
Make sure your subscription covers data downloads and that the Internet settings in your phone are correct. See *Internet and messaging settings* on page 33 for more information on how to enable data traffic, data roaming, and download Internet settings. Contact your network operator for more information about your subscription settings.

Error messages

No network coverage
- Your phone is in Airplane mode. Make sure Airplane mode is turned off.
- Your phone is not receiving any network signal, or the received signal is too weak. Contact your network operator and make sure that the network has coverage where you are.
- The SIM card is not working properly. Insert your SIM card in another phone. If this works, it is probably your phone that is causing the problem. In this case, contact the nearest Sony Ericsson service center.

Emergency calls only
You are within range of a network, but you are not allowed to use it. However, in an emergency, some network operators allow you to call the international emergency number 112. See *Emergency calls* on page 36 for more information.

SIM card locked
You have entered your PIN incorrectly 3 times in a row. To unlock the phone, you need the PUK provided by your operator.

SIM card is PUK locked
You have entered your PUK (Personal Unblocking Key) incorrectly 10 times in a row. Please contact your service provider.
Recycle your phone

Sony Ericsson recognizes the importance of recycling so that components and materials are reused. For information on how to recycle in your location, please visit www.sonyericsson.com/recycle/.
